Cover Letter — ZAAHI Investor Package

To: Viktor Jordán — Senior Fundraising Lead Candidate **From:** Zharkyn (Zhan) Ryspayev (Founder, CEO/CTO) · Dmytro (Dymo) Tsvyk (Co-founder, Operations Principal) **Date:** 5 May 2026 **Re:** Curated investor package + first review pass **Under:** Mutual Non-Disclosure Agreement v2, signed 5 May 2026 **Classification:** CONFIDENTIAL

Welcome

Viktor — thank you for taking the meeting today and for moving the NDA across the finish line. The counter-clauses you agreed to are exactly the protections we needed to share the full picture.

This package is the working investor brief we built for our principal investor Rodolphe Belin (“Rudi”) through April. We are sharing it with you as a senior peer — not for blind sign-off, but for a pressure test from someone who has done this before. You will recognise some of the framing as draft-grade and some as already investor-ready; the cover letter below tells you which is which and where your eye matters most.

You will receive **twelve (12) documents** alongside this cover letter. The internal founder-set is fifteen — three documents (`DYMO_PROTECTIONS` , `ZHAN_PROTECTIONS` , `PARKED_PROJECTS`) are held back as founder-only addenda; nothing material to your review is inside them.

Reading order

1. **Executive Summary** — one page, fastest read of the deal shape
2. **Pitch Deck** (markdown source for Figma render) — narrative
3. **Term Sheet** — clause-by-clause; this is where structure lives
4. **MOU (Rudi)** — already drafted; signed 19 April 2026
5. **Financial Model** — Tab 1 Assumptions and Tab 5 Distribution Waterfall first

6. **P&L Statement** — §3 consolidated build, §11 Reconciliation, §13 Comparable Benchmarking
 7. **P&L Research** — sources for §13 above (research artefact)
 8. **Profit Distribution Mechanics** — Dividend Policy mechanics
 9. **Launch Plan** — operational milestones Months 1–12
 10. **Q&A Prep** — anticipated counter-questions
 11. **Competitor Deep Dive 2026** — competitive map
 12. **Investor Package Index (README)** — wayfinding
-

What is genuinely solid

Below the points that the package can defend in due-diligence today:

- **Live product** at `zaahi.io` — 114 verified parcels rendered as proprietary 3D ZAAHI Signature, 556,000 plots mapped via PMTiles, Phase 1 dashboards live, Archibald AI assistant live. Not a wireframe.
 - **Founder credentials** — RERA-licensed; combined 35 years real- estate / 18 years global ops; full-stack engineering and Master Tree v3 architecture authored by the CEO/CTO directly.
 - **Master Tree v3** — 85 sections, 12 blocks, additive-only plugin architecture. ~6–8 % live by section count today; the remaining 92 % is the long-horizon asset.
 - **Cross-document number reconciliation** — `P_AND_L §11` is the single source of truth and reconciles 1:1 with EXEC_SUMMARY, PITCH_DECK Slide 15, FINANCIAL_MODEL, and the Dividend Policy worked example. AED 8.31 M Y1 / AED 190 M Y5 / AED 437 M 10-year Rudi return all reconcile.
 - **Tax efficiency design** — three-layer (Agency 9 % CT post-SBR + ADGM QFZP + 0 % personal) targeting ~2–4 % combined effective. SBR not applicable Y1 (revenue exceeds AED 3 M threshold); 70 % Service Fee deduction at Agency level is the primary lever.
-

Six areas where your senior eye is the most valuable input

We have flagged these explicitly so you can spend your first review pass on them rather than re-deriving the rest.

(a) F2 — Instrument structure: SAFE → loan transition

The package was drafted for a Post-Money SAFE. We have ratified a pivot to a **loan** structure on 5 May 2026; final terms (principal, rate, conversion mechanic into the Sunset trigger, secured / unsecured) finalise at the Rudi meeting **Wednesday 6 May 2026**.

Every SAFE-mention document carries a top-of-doc *Structure Note* flagging this. Numbers and mechanics remain directionally accurate; the instrument label and \$3 / \$4 / \$6 conversion clauses in the TERM_SHEET will rewrite next revision.

Where your view matters: loan-vs-SAFE has tax, liquidation- preference, and convertibility implications under UAE / ADGM practice. Your read on whether the loan structure should preserve the AED 2 M cumulative / 5-year Sunset trigger (i.e. trigger loan→equity conversion) or operate as a discrete repayable instrument with separate equity grants would shape the rewrite.

(b) Y1 budget envelope reading — (i) fixed-only or (ii) all-in?

The founder ratified a **Y1 budget envelope of AED 1.5–1.7 M** on 5 May 2026, replacing the prior AED 1.0 M (Rudi's launch tranche).

`docs/viktor-package/CASCADE_FLAGS.md` §3.2 lays out the fork:

- **Reading (i)** — AED 1.5–1.7 M is a fixed-cost-only re-presentation of existing P&L OpEx. Variable Cost-of-Revenue (agent commissions ~AED 1.17 M Y1, deal-direct costs ~AED 0.63 M Y1) sits above and scales with revenue. Reconciles to P&L Y1 total of AED 3.41 M. No 437× MOIC recalc needed.
- **Reading (ii)** — AED 1.5–1.7 M is an all-in cash-burn revision. Forces document-wide P&L recalc; pushes Y1 EBITDA Margin from 59 % to ~80 % (probably not credible) and Sunset Financial Trigger from mid-Y3 to late-Y2.

Where your view matters: which reading would a tier-1 LP read into the package? We have currently encoded Reading (i) ambiguously in PITCH_DECK Slide 16 and LAUNCH_PLAN Orientation; either reading can be tightened. Your call would shape the rewrite.

(c) Source of the AED 0.5–0.7 M envelope expansion above Rudi's AED 1.0 M

Three plausible sources, none currently encoded:

- Founder cash injection (Zhan / Dymo personal capital)
- First-deal agency revenue reinvested in Months 4–12 (Plot 1 is a Jun 19 2026 target; Y1 cumulative cash position end Q4 ≈ AED 5.7 M base case)

- Bridge loan or deferred founder salaries

Your view on which is cleanest from an LP-narrative perspective would resolve this. Affects FINANCIAL_MODEL Tab 1 §1.5 Capital Structure and the cap-table presentation.

(d) §12(f) Founder authority ceiling — fixed or scaling?

We have just codified joint Zhan + Dymo spending authority at AED 100 k single-event / AED 500 k cumulative monthly, without prior Board resolution (TERM_SHEET §12(f), inserted today).

Y1 cash flow stays comfortably below AED 500 k/mo (peak Month 12 $\approx$ AED 470 k); Y2+ ordinary OpEx exceeds AED 500 k/mo. **Open question:** does the ceiling escalate (e.g., AED 1 M/mo Y2 $\rightarrow$ AED 2 M/mo Y3+) or stay fixed and require Board recurring pre-approvals from Y2?

Your view on what is reasonable governance for a controlling- investor-to-equal-partnership vehicle of this size would resolve it.

(e) Pressure-test the 437 $\times$ MOIC trajectory as a senior CFO

The base-case 437 $\times$ MOIC over 10 years on Rudi's AED 1 M decomposes into $\sim$ AED 115 M Agency + Platform cash distributions (Y1–Y10) plus $\sim$ AED 322 M Platform IPO proceeds at Y10 (5.6 B AED IPO valuation, 5.8 % post-Series-C dilution, no Rudi pro-rata participation).

The Rule of 40 trajectory averages 170 over Y2–Y5 (versus the Series-A benchmark of 30–40). The combined effective tax burden targets 2–4 % across the structure. The dilution ladder is the most aggressive assumption and the IPO-multiple compression (8–9 $\times$ revenue at Y10 = AED 4.8–7.2 B EV) is industry-standard for mature PropTech.

Where your view matters: what would you stress more or less, relative to the comparable companies in P_AND_L §13? Would you add a Conservative-case MOIC headline figure of $\sim$ 220 $\times$ alongside the 437 $\times$ to pre-empt the inevitable LP question? Would you recommend a third “downside-floor” stress scenario beyond the existing four Sunset scenarios?

(f) Investor-pipeline introduction — first three names

Your stated network spans VC, corporate venture, and family-office LPs. We are particularly interested in family offices with UAE real-estate exposure or Series A leads who have closed PropTech in the GCC (Sanabil, Mubadala, Hub71 syndicates, Dubai Future District Fund, regional Equity Gate LPs).

Ask: the first three candidates you would want to put in front of this package, in the order you would approach them, with one sentence each on why. We do not need decks for them yet — your ranking helps us calibrate the package's positioning before we go.

What else would make this package stronger

Beyond the six items above — **where else does your experience tell you this package is missing something a senior LP will ask for, or where the framing is still founder-naive?**

We are deliberately leaving the question open. Cover letters that list every gap before the reviewer sees them risk pre-empting the reviewer's most valuable instinct. We trust your read.

Practical notes

- **Format.** All twelve external documents are PDF, branded consistently. Source markdown lives on the local research branch (`research/viktor-package-2026-05-05`); we can share specific source files on request.
 - **Versioning.** Every document is **As of 5 May 2026** apart from the MOU and Term Sheet, which retain their original 19 April 2026 dates as the historical signing record. The TERM_SHEET is also where the Structure Note (F2 pivot) is most visible.
 - **Confidentiality.** This package is shared under the NDA v2 signed today. The information rights, founder-protection addenda, and full Master Tree \$41–\$85 are held back from external distribution by default; we share on request to specific reviewers under additional written confirmation.
 - **Turnaround.** First review pass: any pace you want. Second pass after the 6 May Rudi meeting (Term Sheet rewrite for the loan structure) — by end of week 19 May would let us slot any introductions ahead of the first DLD-transfer-certificate close target (19 June 2026).
 - **Disclosure log.** Entry 1 of the disclosure log accompanies this package — a single PDF stating that the twelve documents, this cover letter, and the executed NDA v2 form the complete set delivered to you on 5 May 2026.
-

Closing

Viktor — we are aware that asking a senior fundraising lead for a review pass on a draft package is not the same as asking for endorsement. We are asking for the former. If after the read you believe the package belongs in front of LPs as-is, we go. If you believe it needs three more weeks of work, we listen and rebuild.

We look forward to your read.
