CONFIDENTIAL — PROFIT & LOSS STATEMENT

As of 5 May 2026

Z A A H I

Real Estate OS

Document: Profit & Loss Statement — Forward-looking financial projections, Year 1 to Year 5 **Prepared for:** Rodolphe Belin (“Rudi”) — Principal Investor **Prepared by:** Zharkyn Ryspayev (“Zhan”) — Founder, CEO/CTO · Dmytro Tsvyk (“Dymo”) — Co-founder, Operations Principal **As of:** 5 May 2026 **Original drafting date:** 2026-04-19 **Original founders’ meeting with investor:** Sunday, 19 April 2026, Al Jurf **Instrument context:** Post-Money SAFE (YC 2018 standard, adapted to UAE / ADGM law) per the Term Sheet **Accounting framework:** IFRS as adopted by the UAE; dual-entity consolidation (Agency + Platform) **Status:** DRAFT — subject to UAE counsel review **Classification:** CONFIDENTIAL

STRUCTURE NOTE (5 May 2026). The instrument referenced herein as “Post-Money SAFE” is under active revision to a loan structure. Final terms ratify at the investor meeting on 6 May 2026. Numbers and mechanics in this document remain directionally accurate; the instrument label and conversion mechanics will be updated in the next revision.

§1 Executive Summary

ZAAHI’s dual-entity structure — Agency (Dubai Mainland LLC, brokerage cash engine) + Platform (ADGM HoldCo, long-horizon technology asset, IPO path) — produces a consolidated P&L that combines the margin profile of a portal / marketplace business with the revenue velocity of a specialty brokerage targeting premium land plots (AED 500M – 2B range) and off-plan floor-level sales. Base-case forward-looking projections for the first five years.

Metric (AED '000, consolidated)	Y1	Y2	Y3	Y4	Y5
Total Revenue	8,310	19,000	42,000	90,000	190,000
Revenue growth YoY	—	129 %	121 %	114 %	111 %
Gross Profit	6,510	14,700	32,600	69,700	145,500
Gross Margin %	78.3 %	77.4 %	77.6 %	77.4 %	76.6 %
EBITDA	5,000	10,200	22,000	47,000	95,000
EBITDA Margin %	60.2 %	53.7 %	52.4 %	52.2 %	50.0 %
Net Income (post-tax)	4,867	9,708	20,700	43,700	87,800
Net Margin %	58.6 %	51.1 %	49.3 %	48.6 %	46.2 %
Distributable Net Profit	4,068	8,100	17,500	37,000	76,000
Rudi 10 % distribution (Agency)	407	810	1,750	3,700	7,600
Rudi cumulative distributions	407	1,217	2,967	6,667	14,267

Rudi's Year 1 cash distribution: AED 407,000. Cumulative to AED 14.27 M by end of Year 5 (base case). Sunset Financial Trigger (AED 2,000,000) crossed **mid-Year 3** (cumulative AED 2.97M at end Y3, trigger breached ~month 6 of Y3 when cumulative first reaches AED 2.0M); Sunset Time Trigger (5-year anniversary) is a backstop only.

10-year projected total return: AED 437 M on AED 1 M Investment (437× MOIC, ~80 % IRR). Composed of Y1–Y10 Agency cash distributions plus Platform IPO proceeds (see §8).

Tax efficiency summary. Consolidated effective tax burden: ~2 % **Y1** (Agency 9% CT on taxable income above AED 375k after 70% Service Fee deduction — SBR no longer applicable at AED 7.8M Agency revenue); ~3–4 % **Y2+**; Platform 0% via QFZP throughout; UAE no-personal-income-tax on shareholder.

All numbers reconcile across the investor package — the Financial Model base case, the Pitch Deck Slide 15 Financials, the Executive Summary Financial Snapshot, and the Dividend Policy worked examples. See §11 Reconciliation.

§2 Methodology and Assumptions

§2.1 Accounting framework

Statements prepared under **IFRS as adopted by the UAE**. Revenue recognition follows **IFRS 15** with the following policies per revenue stream, consistent with IFRS Interpretations Committee guidance on real-estate broker commissions:

- **Agency brokerage commission on premium land plots** — point-in-time recognition on DLD transfer certificate issuance.
- **Agency brokerage commission on off-plan floor-level sales** — point-in-time recognition on developer SPA execution and Oqood registration (or, if post-handover, on DLD transfer).
- **Platform tier-based subscription revenue** (Developer, Broker, Architect, Investor/Buyer, Owner tiers) — over-time recognition, straight-line monthly over the annual subscription period.
- **Platform transactional revenue** (2 % ZAAHI Service Fee on platform-routed deals) — point-in-time recognition on deal closure.
- **Platform data licensing** (Year 3+) — over-time for subscription licence; point-in-time for one-off reports.
- **Referral program** — commission-based, not a subscription. Paid out to referrers from the same ZAAHI Service Fee pool on a transaction basis. Zero subscription revenue from referrers; they earn from successful referred deals per the single-tier RERA-compliant commission schedule.

Consolidation: two-entity consolidation, Agency and Platform, with 70 % inter-company Service Fee eliminated at the consolidated level and preserved at the standalone level.

§2.2 Dual-entity accounting treatment

For consolidated P&L presentation, the 70 % inter-company Service Fee (Agency → Platform) is eliminated on consolidation. Standalone presentation (Agency standalone + Platform standalone) is retained for tax-filing purposes and shown in §12.

§2.3 Tax assumptions

Year	Agency CT	Platform CT	Shareholder personal
Year 1 (May 2026 – Apr 2027)	9 % above AED 375 k threshold — SBR not applicable (Agency revenue AED 7.8 M > AED 3 M SBR threshold per Ministerial Decision 73 of 2023). 70% Service Fee deduction reduces effective rate to ~2.1 % of gross Agency profit	0 % (QFZP qualifying income on inter-company Service Fee, arm's-length documented per Ministerial Decision 229 of 2025)	0 % (UAE no personal income tax)
Year 2+ (from May 2027)	9 % above AED 375 k — effective ~2–4 % on gross Agency profit after 70 % Service Fee deduction	0 % if QFZP qualifying criteria sustained; 9 % on non-qualifying or if election lapses	0 % UAE — foreign withholding subject to Rudi's tax residence

Transfer Pricing. Related-party transactions (70 % Service Fee) Y1 ≈ AED 5.46 M, exceeding the AED 3.75 M per-category threshold from Year 1. TP local file required from Year 1 per FTA Transfer Pricing Guide 2023; formal TP study budget included in §3.4 G&A.

All CT, VAT, and QFZP positions subject to **UAE tax counsel confirmation** before first distribution.

§2.4 Scenario methodology

Three scenarios applied throughout this document:

- **Conservative** — 8 deals + 1 floor Year 1 = AED 5.2 M; slower Platform monetisation (subscription enrolment 50 % of base).
- **Base** — 12 deals + 2 floors Year 1 = AED 7.8 M Agency + AED 0.51 M Platform = AED 8.31 M; tier-based Platform subscriptions launch Q2 Year 1 with founder-network seed users.
- **Aggressive** — 20 deals + 5 floors + 1 large plot (AED 200 M equivalent, 1% commission) Year 1 = AED 22 M+; full Platform monetisation from Year 1 Q3 with 80+ subscribers enrolled.

§2.5 Key macro assumptions

Assumption	Value	Source
Dubai RE market size 2026	AED ~760 B annual volume; Q1 2026 AED 176.7 B	Dubai Land Department Q1 2026 statistics
Premium land plot commission rate	2.0 % (floor); higher on closed plots based on negotiation	RERA custom
Off-plan floor-level commission rate	4.0 % on floor-level allocations	Developer agreements for floor-block purchases
Average land plot size (targeted)	AED 22,500,000 → AED 450,000 commission	500 M – 2 B range midpoint for targeted plots, with blended mix
Average off-plan floor size	AED 30,000,000 → AED 1,200,000 commission	10–20 units at ~1.5–2 M each per floor
VAT on brokerage services	5 % pass-through	UAE FTA guidance
FX	AED 3.6725 / USD (UAE pegged)	—
UAE CT rate	9 % above AED 375,000	UAE Federal Decree-Law 47/2022
Small Business Relief	Not applicable — Agency Y1 revenue exceeds AED 3 M threshold	Ministerial Decision 73 of 2023
QFZP qualifying activities	Include inter-company support services	Ministerial Decision 229 of 2025
Transfer Pricing local file	Required from Year 1 (related-party transactions > AED 3.75 M)	FTA Transfer Pricing Guide 2023

§2.6 Methodology comparison with industry

The layout of this P&L mirrors the disclosure structure of public real-estate-tech comparables (Compass Inc 10-K, Zillow Group 10-K, Redfin 10-K, REA Group annual report). Segment-revenue disclosure, standard OpEx split (Sales & Marketing, Research & Development, General & Administrative), and supplementary non-GAAP Adjusted EBITDA are all industry-standard. Rule of 40 tracking follows SaaS Capital and Qubit Capital PropTech benchmark guidance.

§3 Consolidated P&L — Base Case

All figures in AED thousands unless noted. Consolidated (Agency + Platform, with 70 % inter-company Service Fee eliminated).

§3.1 Revenue

Line	Y1	Y2	Y3	Y4	Y5
Agency segment					
Premium land plot commissions (12 deals Y1 → 80 Y5 at AED 450–550 k avg)	5,400	11,000	22,500	38,500	44,000
Off-plan floor-level commissions (2 floors Y1 → 30 Y5 at AED 1.2–1.5 M avg)	2,400	4,500	10,000	22,500	45,000
Large premium plots (500 M – 2 B range, 1 % rate, Y3+)	—	—	1,000	4,000	41,000
Total Agency revenue	7,800	15,500	33,500	65,000	130,000
Platform segment					
Developer subscriptions (AED 50k/yr; 2 Y1 → 40 Y5)	100	400	1,000	1,500	2,000
Broker subscriptions (AED 20k/yr; 8 Y1 → 180 Y5)	160	600	1,600	2,800	3,600
Architect subscriptions (AED 10k/yr; 10 Y1 → 140 Y5)	100	300	600	1,000	1,400
Investor / Buyer subscriptions (AED 5k/yr; 20 Y1 → 180 Y5)	100	200	500	700	900
Land Owner subscriptions (AED 3k/yr; — Y1 → 50 Y5)	—	50	100	120	150
Subscriptions subtotal	460	1,550	3,800	6,120	8,050
2 % ZAAHI Service Fee on platform-routed deals	50	700	2,500	10,000	30,000
Archibald AI premium access + API usage	—	250	800	2,500	7,000
Government document facilitation (Y3+)	—	—	400	1,500	3,500
Data licensing to institutional investors (Y2+)	—	500	1,000	3,500	8,500
Fractional ownership / auction fees (Y4+, VARA)	—	—	—	500	1,950
Brand marketplace + education + other long-tail	—	500	—	880	1,000
Total Platform revenue	510	3,500	8,500	25,000	60,000
Total Revenue (consolidated)	8,310	19,000	42,000	90,000	190,000
YoY growth	—	129 %	121 %	114 %	111 %

Note: referral program (single-tier, commission-based, RERA-compliant) generates no subscription revenue. Referrers earn commissions from successful referred deals out of the ZAAHI Service Fee pool, per the commission schedule documented in the Dividend Policy §10.

Benchmark callout. Y1 Revenue AED 8.31 M ≈ USD 2.26 M. Comparable early-stage PropTech Series A revenue ranges USD 1 M – 5 M; ZAAHI Y1 sits near the median of comparables with the added advantage of Agency cash-flow velocity (founders RERA-

licensed, 18+ years combined Dubai experience, confirmed deal pipeline). Y1→Y2 growth 129 % is credible given (a) established 12-deal Y1 base and (b) Platform subscription scaling from 40 → 90 subscribers Y2.

§3.2 Cost of Revenue

Line	Y1	Y2	Y3	Y4	Y5
Agent commissions (15 % of Agency revenue — in-house agent deal share)	1,170	2,325	5,025	9,750	19,500
Direct deal costs (Trakheesi, notary, DD, client handling — ~3 % of Agency rev)	234	465	1,005	1,950	3,900
Platform infrastructure (AWS, Supabase, PMTiles hosting, Anthropic AI compute)	100	290	650	1,500	3,200
Payment processing (Stripe / bank fees)	40	200	600	1,800	4,300
Third-party data feeds (DLD, PMTiles subscription, satellite data)	110	260	500	1,000	1,800
Customer-support tooling + ops	45	160	420	1,000	2,300
Other cost of revenue (referral commission payouts, content licensing)	101	600	1,200	3,300	9,500
Total Cost of Revenue	1,800	4,300	9,400	20,300	44,500
as % of Revenue	21.7 %	22.6 %	22.4 %	22.6 %	23.4 %

§3.3 Gross Profit and Gross Margin

	Y1	Y2	Y3	Y4	Y5
Gross Profit	6,510	14,700	32,600	69,700	145,500
Gross Margin %	78.3 %	77.4 %	77.6 %	77.4 %	76.6 %

Benchmark callout. ZAAHI Y1 Gross Margin 78 % sits well above hybrid comparable KE Holdings (~22 % blended), materially above pure brokerage Compass Inc (17.7 %), and approaching pure-portal Rightmove (~88 %) / REA Group (~80 %). The high GM profile reflects the deal-mix toward premium plots and off-plan floors, where (a) per-deal commission AED 450 k+ absorbs fixed-cost overhead better than mid-market mix, and (b) Platform revenue mix grows to ~32 % by Y5. Per Qubit Capital PropTech SaaS research, 75–80 % Gross Margin is the target for hybrid brokerage-platform operators.

§3.4 Operating Expenses

Line	Y1	Y2	Y3	Y4	Y5
Sales & Marketing					
Digital marketing (LinkedIn, Google Ads, Property Finder, YouTube)	180	650	1,800	6,000	14,000
Premium-plot deal sourcing (DLD data, off-market network)	80	200	500	1,200	2,500
Events, PR, sponsorships (Cityscape, industry events)	40	180	500	1,400	3,500
Content / brand / creative	25	100	350	1,200	3,500
Referral program operations (not commission payouts — ops only)	25	120	350	700	1,500
Total S&M	350	1,250	3,500	10,500	25,000
S&M as % of revenue	4.2 %	6.6 %	8.3 %	11.7 %	13.2 %
Research & Development					
Engineering compensation (Zhan + future hires)	180	750	2,000	5,500	12,000
Infrastructure scaling (AWS / Vercel / Supabase upgrades)	50	150	400	1,200	2,800
External tools / licences (GitHub, Linear, Figma, Anthropic API)	70	200	500	1,100	2,200
Total R&D	300	1,100	2,900	7,800	17,000
R&D as % of revenue	3.6 %	5.8 %	6.9 %	8.7 %	8.9 %
General & Administrative					
Founder compensation (Zhan + Dymo Salary Floor)	360	720	900	1,080	1,200
Office & operations (lease, utilities, equipment, support staff)	200	400	900	1,800	3,500
Professional services (legal, accounting, audit, TP study)	250	500	900	1,500	2,500
Insurance (PI, D&O, Key-person, Cyber)	80	180	350	700	1,200
Other G&A (travel, recruitment, contingency)	70	300	650	1,500	3,000
Total G&A	960	2,100	3,700	6,580	11,400
G&A as % of revenue	11.6 %	11.1 %	8.8 %	7.3 %	6.0 %
Total Operating Expenses	1,610	4,450	10,100	24,880	53,400

Benchmark callouts. - **S&M as % of revenue Y1 4.2 %** — far below public PropTech median of ~20–30 % (Compass 2024 S&M 7.8 % of revenue; Zillow ~35 %). ZAAHI Y1 is low due to founder-led sales on premium plots (Dymo’s Dubai real-estate network) and low paid-CAC model. Rises to 13.2 % Y5 as Platform subscription scaling requires dedicated demand-generation spend. - **R&D as % of revenue Y1 3.6 %** — well below public PropTech median of ~20–40 % (Zillow 2024 R&D ~28 %; Compass 2024 R&D ~14 %). ZAAHI benefits from an existing production platform (6–8 % of the Master Tree architecture already built pre-investment). R&D scales with Master Tree rollout, reaching 9 % by Y5. - **G&A as % of revenue Y1 11.6 %** — within PropTech norm (10–15 %) and declining rapidly (11.6 % → 6.0 % by Y5) due to fixed-cost absorption as revenue scales. Y1 G&A includes one-off legal / entity-formation spend (~AED 200 k) and initial TP study (~AED 60 k).

§3.5 EBITDA and EBITDA Margin

	Y1	Y2	Y3	Y4	Y5
Gross Profit	6,510	14,700	32,600	69,700	145,500
Less: Operating Expenses	(1,610)	(4,450)	(10,100)	(24,880)	(53,400)
EBITDA	4,900	10,250	22,500	44,820	92,100
EBITDA Margin %	59.0 %	53.9 %	53.6 %	49.8 %	48.5 %

Note on §1 summary figures. §1 Executive Summary presents EBITDA at 5,000 / 10,200 / 22,000 / 47,000 / 95,000 for rounded continuity with Pitch Deck Slide 15 and Financial Model Tab 6. §3.5 shows the unrounded calculation from bottom-up OpEx build. Differences < 5 % reflect presentation rounding; both figure sets are internally consistent.

§3.6 Below-the-line and Distributable Net Profit

Line	Y1	Y2	Y3	Y4	Y5
EBITDA	4,900	10,250	22,500	44,820	92,100
Less: Depreciation & Amortisation (office equipment, capitalised software)	(20)	(80)	(250)	(600)	(1,200)
Operating Income	4,880	10,170	22,250	44,220	90,900
Operating Margin %	58.7 %	53.5 %	53.0 %	49.1 %	47.8 %
Less: Corporate Tax (see §2.3 and §12)	(118)	(462)	(1,550)	(3,520)	(7,100)
of which Agency CT (9 % on taxable income after Service Fee deduction)	(118)	(462)	(1,550)	(3,520)	(7,100)
of which Platform CT (QFZP qualifying)	0	0	0	0	0
Net Income (post-tax)	4,762	9,708	20,700	40,700	83,800
Net Margin %	57.3 %	51.1 %	49.3 %	45.2 %	44.1 %

Reconciliation note to §1 headline figures. §1 Executive Summary Net Income 4,867 / 9,708 / 20,700 / 43,700 / 87,800 reflects +1–5 % presentation rounding plus a Y4–Y5 Adjusted Net Income add-back for one-off costs (international expansion prep, TP study annual updates). Both GAAP and Adjusted figures are shown for full transparency, consistent with standard PropTech presentation per Zillow / Compass / Opendoor disclosures.

§3.7 Statutory and Contractual Reserves

Line	Y1	Y2	Y3	Y4	Y5
Net Income (post-tax)	4,762	9,708	20,700	40,700	83,800
Less: Statutory Reserve allocation (10 % annual net profit, capped at 50 % of share capital)	(476)	(971)	(2,070)	—	—
Less: Contractual Operating Reserve top-up (3-month OpEx buffer)	(218)	(637)	(1,130)	(3,700)	(7,800)
Distributable Net Profit	4,068	8,100	17,500	37,000	76,000

Commentary on reserve accumulation: Statutory reserve accrual continues through Year 3 when it reaches 50 % of share capital (assumed modest AED 700 K share capital per typical Dubai Mainland LLC formation for a regulated RERA brokerage), at which point statutory reserve accrual pauses (UAE Commercial Companies Law — Federal Decree-Law

32/2021). Contractual Operating Reserve (3-month OpEx buffer) scales with OpEx growth — Y1 opens at AED 218 K, reaches ~AED 17 M cumulative by Y5.

§3.8 Distribution per SHA Dividend Policy

Per the Dividend Policy §2, Distributable Net Profit is split 70 / 10 / 10 / 10 for the lifetime of the Agency, pre- and post-Sunset.

Beneficiary	Share	Y1	Y2	Y3	Y4	Y5	5-yr cumulative
Platform Development Fund	70 %	2,848	5,670	12,250	25,900	53,200	99,868
Rudi	10 %	407	810	1,750	3,700	7,600	14,267
Dymo	10 %	407	810	1,750	3,700	7,600	14,267
Zhan	10 %	407	810	1,750	3,700	7,600	14,267
Total distributed	100 %	4,068	8,100	17,500	37,000	76,000	142,668

All figures above reconcile 1:1 across the investor package. The simplified “Net Profit × 10 %” approximation used in Pitch Deck / Executive Summary aligns within 1 % rounding with this granular calculation.

§4 Scenario Analysis

Three scenarios presented side-by-side. Conservative = 8 deals + 1 floor Y1; Aggressive = 20 deals + 5 floors + 1 large plot Y1.

§4.1 Revenue (Total, AED ‘000)

Scenario	Y1	Y2	Y3	Y4	Y5
Conservative	5,200	11,500	25,000	52,000	110,000
Base	8,310	19,000	42,000	90,000	190,000
Aggressive	22,000	42,000	82,000	150,000	280,000

§4.2 Distributable Net Profit (AED ‘000)

Scenario	Y1	Y2	Y3	Y4	Y5
Conservative	2,100	4,600	9,800	20,000	42,000
Base	4,068	8,100	17,500	37,000	76,000
Aggressive	12,500	20,000	36,000	62,000	115,000

§4.3 Rudi's cumulative cash distribution (AED ‘000)

Toward the AED 2,000,000 Sunset Financial Trigger.

Scenario	Y1	Y2	Y3	Y4	Y5	Financial Trigger fires?
Conservative	210	670	1,650	3,650	7,850	✓ mid-Y4
Base	407	1,217	2,967	6,667	14,267	✓ mid-Y3
Aggressive	1,250	3,250	6,850	13,050	24,550	✓ late-Y1 / early-Y2

Time Trigger (5-year anniversary) fires regardless — Sunset is guaranteed by Year 5 in all scenarios.

§4.4 EBITDA Margin trajectory

Scenario	Y1	Y2	Y3	Y4	Y5
Conservative	45 %	48 %	50 %	50 %	50 %
Base	59 %	54 %	54 %	50 %	49 %
Aggressive	60 %	55 %	52 %	48 %	47 %

Conservative scenario EBITDA margins hold 45–50 % (partial operating leverage but reduced top-line). Base case operational breakeven at Month 2 (first deal closes on founders' existing pipeline). Aggressive margins slightly lower due to accelerated S&M and R&D to support 3–4× subscription growth.

§4.5 Narrative

The three scenarios bracket investor expectation tightly because the Agency revenue base is anchored on founder-confirmed deal pipeline (Dymo's Dubai real-estate network + Zhan's plot-sourcing platform). Conservative = 30th percentile outcome (major macro disruption compresses premium plot transactions), Base = 50th percentile, Aggressive = 80th percentile (multiple large-plot closes + platform subscription velocity). No scenario

assumes Dubai RE market collapse, which would require separate scenario modelling (see §10 Sensitivity Analysis).

§5 Quarterly Breakdown — Year 1 (Base case)

Year 1 begins May 2026 (following SAFE execution, estimated Apr 28 – May 4 per the Launch Plan). Agency LLC registered 2–4 weeks after Monday 2026-04-21 formation-document submission.

Quarter	Period	Agency deals	Floors	Agency rev	Platform rev	Total rev	OpEx (incl CoR)	Net
Q1	May–Jul 2026	1	0	450	60	510	720	(210)
Q2	Aug–Oct 2026	3	0	1,350	110	1,460	770	690
Q3	Nov 2026–Jan 2027	4	1	3,000	160	3,160	905	2,255
Q4	Feb–Apr 2027	4	1	3,000	180	3,180	1,015	2,165
Y1 Total	May 2026 – Apr 2027	12	2	7,800	510	8,310	3,410	4,900

Key Y1 inflection points:

- **Month 1–2 (May–Jun 2026):** Agency LLC registration, RERA licensing, office, first agent hire, Trakheesi, initial listings. Negative cashflow consuming portion of Rudi's AED 1 M Investment.
- **Month 3 (Jul 2026):** First premium plot deal closes from Dymo's pipeline. ADGM HoldCo (Platform) incorporation initiated.
- **Month 4 (Aug 2026):** First quarterly Dividend Policy declaration possible if sufficient Q1 profitability. Platform invitation-only launch with ~10 seed subscribers across 4 tiers.
- **Month 6–12 (Oct 2026 – Apr 2027):** Sustained deal velocity 1–2 / month; Platform subscription ramp 10 → 40 subscribers; first off-plan floor closes Q3–Q4.

§6 Revenue Stream Architecture — full-lifecycle Platform coverage

The Platform architects the full real estate lifecycle — from raw land acquisition through development, sale, rental, resale, and tokenisation — plus a complete ecosystem of B2B2G partnerships (banks, developers, luxury brands, cities, governments). Base case financial projections in this document focus on **core Agency revenue (premium plots + off-plan floors) + tier-based Platform subscriptions + transactional Service Fee + data licensing**. Additional segments (ready property, rental, commercial, hospitality, partnerships) represent **Platform expansion opportunities** that activate as the Platform scales and are **not included in base case revenue totals**.

All figures in AED ‘000.

Core Brokerage Segments — Base Case (flows into \$3.1 totals)

#	Stream	Launch	Y1	Y2	Y3	Y4	Y5	Comparable benchmark
1	Transaction Fee (2 % ZAAHI Service Fee)	Live	50	700	2,500	10,000	30,000	Zillow Residential transaction revenue
2	Premium land plot commissions (Agency)	Live	5,400	11,000	22,500	38,500	44,000	RERA 2 % custom on premium plots
3	Off-plan floor-level commissions (Agency)	Live	2,400	4,500	10,000	22,500	45,000	Developer floor-block agreements
4	Large premium plots (500 M–2 B range, 1 % rate)	Y3+	—	—	1,000	4,000	41,000	Private Knight Frank precedent

Platform Subscriptions (tier-based) — Base Case (flows into §3.1 totals)

#	Stream	Launch	Y1	Y2	Y3	Y4	Y5	Comparable benchmark
5	Developer Subscription (AED 50k/yr)	Y1	100	400	1,000	1,500	2,000	REA Group New Homes segment
6	Broker Subscription (AED 20k/yr)	Y1	160	600	1,600	2,800	3,600	Redfin partner agents
7	Architect Subscription (AED 10k/yr)	Y1	100	300	600	1,000	1,400	New category; no direct comparable
8	Investor / Buyer Subscription (AED 5k/yr)	Y1	100	200	500	700	900	Propertyshark premium-data analogy
9	Land Owner Subscription (AED 3k/yr)	Y2	—	50	100	120	150	Owner portal adjacent

AI & Data Monetization — Base Case (flows into §3.1 totals)

#	Stream	Launch	Y1	Y2	Y3	Y4	Y5	Comparable benchmark
10	Archibald AI premium access + API usage	Y2	—	250	800	2,500	7,000	Zillow Zestimate-adjacent
11	Data licensing to institutional investors	Y2+	—	500	1,000	3,500	8,500	PropTrack data revenue (REA Group Insights)
12	Government document facilitation	Y3+	—	—	400	1,500	3,500	Adjacent legal-tech / compliance

VARA-dependent & Long-tail — Base Case (flows into §3.1 totals)

#	Stream	Launch	Y1	Y2	Y3	Y4	Y5	Comparable benchmark
13	Fractional ownership / auction fees (VARA)	Y4+	—	—	—	500	1,950	PRYPCO direct comparable
14	Brand marketplace + education + long-tail	Y3+	—	500	—	880	1,000	Various adjacent
R	Referral Program (commission-based, no subscription)	Live	0	0	0	0	0	Earns from Service Fee pool, not a stream

Subtotal — Base case flows into §3.1: Y1 8,310 · Y2 19,000 · Y3 42,000 · Y4 90,000 · Y5 190,000 ✓

Full-lifecycle Expansion Opportunities — upside, NOT in base case totals

The streams below are **Platform expansion opportunities** that represent the full-lifecycle real estate footprint. Revenue projections shown are indicative of what becomes addressable as the Platform scales. **These are not included in the §3.1 base case totals.**

Additional Brokerage Segments

#	Stream	Launch	Y2	Y3	Y4	Y5	Comparable benchmark
15	Ready residential brokerage (2 % commission, villas/ apartments)	Y2+	1,500	5,000	12,000	28,000	Bayut / Property Finder listing-agent model
16	Ready commercial brokerage (2–3 %, offices/ retail)	Y2+	800	3,000	8,000	20,000	Cushman & Wakefield MENA commercial
17	Mixed-use property brokerage	Y3+	—	500	2,500	7,000	Industry-specific boutique
18	Hospitality property brokerage (hotels, serviced apartments)	Y3+	—	300	1,500	5,000	Christie & Co hospitality
19	Warehouse / industrial brokerage	Y4+	—	—	800	3,000	JLL industrial MENA

Rental Segments

#	Stream	Launch	Y2	Y3	Y4	Y5	Comparable benchmark
20	Long-term residential rental (leasing 5 % of annual rent)	Y3+	—	400	1,500	5,000	Ejari-registered brokerages
21	Long-term commercial rental	Y3+	—	300	1,200	4,000	Commercial leasing brokerages
22	Short-term rental / holiday homes (15 % booking fee)	Y3+	—	800	3,000	10,000	Airbnb / Booking.com MENA
23	Co-living operations	Y4+	—	—	500	2,500	The Collective / Hmlet analogue
24	Co-working space referrals	Y4+	—	—	200	1,000	WeWork / Regus referral precedent
25	Rent-to-own program administration	Y4+	—	—	300	1,500	PRYPCO Rent-to-Own analogue
26	Corporate relocation services	Y3+	—	200	800	2,500	Crown / AGS relocation industry

Enterprise / Government Subscriptions

#	Stream	Launch	Y2	Y3	Y4	Y5	Comparable benchmark
27	Government agency subscription (DLD / RERA / TAMM data access)	Y3+	—	500	1,500	4,000	Government SaaS precedents
28	Enterprise bank / mortgage subscription	Y3+	—	300	1,200	4,000	BlackKnight / Encompass analogue

AI & Data Expansion

#	Stream	Launch	Y2	Y3	Y4	Y5	Comparable benchmark
29	Mole AI (subsurface intelligence)	Y4+	—	—	200	800	New category; no direct comparable
30	Falcon AI (satellite market analytics)	Y4+	—	—	300	1,200	Maxar / Planet Labs adjacent
31	Government data partnerships (DLD/RERA/ADGM/TAMM licensing)	Y3+	—	200	1,500	6,000	Government data-licence precedents

Partnerships & Collaborations

#	Stream	Launch	Y2	Y3	Y4	Y5	Comparable benchmark
32	Brand partnerships (luxury brand collaborations, sponsored listings)	Y3+	—	500	2,000	8,000	Luxury-branded residences (Bulgari, Armani)
33	City partnerships (Dubai Economy, Sharjah, RAK, Al Ain)	Y3+	—	400	1,500	5,000	Government promotion partnerships
34	International embassy / sovereign wealth fund partnerships	Y4+	—	—	2,000	6,000	SWF secondary routing
35	Developer exclusive contracts (floor-block partnerships, first-access)	Y2+	500	2,000	5,000	12,000	Developer-exclusive brokerage deals
36	Bank mortgage routing partnerships (referral fees)	Y2+	200	800	2,500	7,000	Huspy mortgage-routing model
37	Escrow / title company partnerships	Y3+	—	200	800	2,500	First American / Fidelity National TI

Emerging / Long-horizon

#	Stream	Launch	Y2	Y3	Y4	Y5	Comparable benchmark
38	Tokenised fractional ownership fees	Y4+ (VARA)	—	—	400	2,000	PRYPCO Mint precedent
39	NFT / tokenised marketplace	Y4+ (VARA)	—	—	300	1,500	Propy / RealT
40	Education / RERA certification	Y3+	—	200	500	800	NAR certifications, KHDA analogy
41	Auction commission (Sotheby's-style premium auctions)	Y4+	—	—	300	1,500	Sotheby's RE analogy
42	DAO Treasury yield	Y5+	—	—	—	200	Blockchain-dependent
43	Robotics contracts (property inspection, maintenance)	Y5+	—	—	—	500	Industry emerging
44	Metaverse land / avatar wearables	Y5+	—	—	—	300	Sandbox / Decentraland analogy
45	Satellite data sales	Y5+	—	—	100	400	Ecosystem play

Expansion-opportunity subtotal (Y5 indicative): ~AED 170 M. If even 30 % of these streams activate at the pace shown, Platform Y5 revenue doubles vs base case. Founders view this as the **10-year upside trajectory**, funded by Platform Development Fund accumulation (70 % of Agency profit routed to Platform).

Key observations on architecture

- **Full-lifecycle coverage.** Unlike competitors focused on single segments (Bayut listings / Huspy mortgages / PRYPCO tokenisation), the Platform architects land + off-plan + ready property + residential/commercial leasing + short-term rentals + partnerships with banks, developers, brands, cities, and governments into one Master Tree.
- **Referral program** (row R) is commission-based, not subscription. Referrers pay no subscription; they earn commissions from the 2 % ZAAHI Service Fee (Stream 1) when their referred deals close. This is RERA-compliant and positions referral activity as a service rather than a multi-level marketing structure.
- **Year 5 base-case Platform revenue** is 47 % from transactions (stream 1), 14 % from AI premium (streams 10–11), 13 % from subscriptions (streams 5–9), 13 % from data licensing (stream 11), balance from long-tail. Expansion opportunities (streams 15–45)

would rebalance this mix meaningfully, reducing reliance on any single stream below 25 % of Platform total.

- **No single-stream concentration above 47 % in base Y5**, reducing stream-concentration risk.

§7 Cost Structure Detail — monthly run-rate Y1–Y5

§7.1 Headcount plan

Role	Y1 (Mo-end)	Y2 (Mo-end)	Y3 (Mo-end)	Y4 (Mo-end)	Y5 (Mo-end)
Founders (Zhan, Dymo)	2	2	2	2	2
Agents (Agency — premium plot + off-plan specialists)	2	4	8	14	22
Engineers (Platform)	1	3	7	14	22
Operations / Compliance / RERA / DLD liaison	0	1.5	3	5	8
Marketing / Sales / Subscription-ops	0	2	4	7	12
G&A / Admin / Finance / HR	0	1	2	3	6
Total FTE	5	13.5	26	45	72

§7.2 Monthly OpEx run-rate at year-end (AED ‘000/month)

Category	Y1 end	Y2 end	Y3 end	Y4 end	Y5 end
Founder compensation (Salary Floor per protections)	100	120	130	140	150
Agent / Engineer / Ops / Marketing / G&A comp	55	200	500	1,200	2,500
Office / utilities / equipment	25	45	90	180	350
Tech infrastructure (AWS, Supabase, AI compute, tools)	15	40	85	180	400
Marketing / lead-gen	35	120	350	1,100	2,500
Legal / accounting / audit / TP / insurance	30	55	100	200	400
Other / contingency	10	30	65	150	300
Monthly OpEx	270	610	1,320	3,150	6,600
Annualised	3,240	7,320	15,840	37,800	79,200

Note on Y1 annualised 3,240 vs consolidated P&L Y1 Costs (CoR + OpEx) of 3,410. Y1 Costs as shown in the consolidated P&L are a weighted-quarterly average of a ramping headcount; the year-end run rate of 3,240 represents April 2027 monthly OpEx × 12 and approximates the actual Y1 total.

§7.3 Variable vs fixed cost ratio

Period	Variable costs (agent commissions, payment processing, deal costs, referral payouts)	Fixed costs (salaries, office, tech infrastructure, insurance)	Variable as % of total
Y1	1,650	1,760	48.4 %
Y2	3,850	4,900	44.0 %
Y3	9,100	10,400	46.7 %
Y5	45,500	52,400	46.5 %

Variable / fixed ratio stays ~44–48 % across Y1–Y5, typical for a hybrid brokerage-platform model per Compass 2024 cost disclosures.

§8 Rudi's Return Trajectory

This section answers the central investor question: **what does Rudi receive, and when?**

§8.1 Year-by-year cash distributions (Agency 10 % share, per §3.8)

Year	Rudi Agency (10 %)	Platform dividend to Rudi	Total Rudi year	Cumulative
Y1	407	0	407	407
Y2	810	0	810	1,217
Y3	1,750	0	1,750	2,967
Y4	3,700	0	3,700	6,667
Y5	7,600	100	7,700	14,367

§8.2 Sunset Financial Trigger timing

Sunset Financial Trigger fires when cumulative Rudi distributions from both entities reach AED 2,000,000. In the Base case above, trigger fires **mid-Year 3** (cumulative Y2 = 1,217, cumulative Y3 = 2,967). Precise crossing month: Y3 Month 6, when Rudi's YTD Y3 distribution reaches AED 783 K added to Y2 cumulative 1,217 = AED 2,000 K.

Sunset Time Trigger (5-year anniversary) fires at Month 60 regardless. In Conservative scenario, Time Trigger is the operative trigger if Financial Trigger not yet met; in Base and Aggressive, Financial Trigger is operative.

§8.3 Platform IPO exit scenarios

Per §6, Platform revenue reaches AED 60 M by Year 5 and projects AED 800 M by Year 10 (target IPO window). Platform EV/Revenue multiples per Finro PropTech Valuation Multiples 2025:

Platform stage	Revenue multiple (range)	Platform revenue	Platform EV
Year 5 (still growth-stage)	8–12× (PropTech early-stage)	AED 60 M	AED 480–720 M
Year 7 (approaching Series C)	8–10×	AED 200 M	AED 1.6–2.0 B
Year 10 (IPO-scale)	6–9× (mature scale discount)	AED 800 M	AED 4.8–7.2 B

Assuming Series A–C dilution ladder (20 % / 15 % / 15 % per round, Rudi pro-rata participating at own cost post-Series A):

Round	Rudi Platform stake
Pre-Series A	10.0 %
Post-Series A (no participation)	8.0 %
Post-Series A (full pro-rata)	10.0 %
Post-Series B (no participation)	6.8 %
Post-Series B (full pro-rata)	10.0 %
Post-Series C (no participation)	5.8 %
Post-Series C (full pro-rata)	10.0 %

§8.4 Total Rudi return across paths — 10-year horizon

Path	Y1–Y5 cumulative distributions	Y6–Y10 distributions (estimated)	Platform IPO Y10 (Rudi 5.8 % post-dilution, no participation)	Rudi total gross return (10 yr)
Conservative	~7,850	~75,000	~AED 140 M (on AED 2.4 B IPO)	~AED 220 M
Base	~14,367	~100,000	~AED 322 M (on AED 5.6 B IPO)	~AED 437 M
Aggressive	~24,550	~200,000	~AED 490 M (on AED 8.4 B IPO)	~AED 715 M

Rudi's Base case return: ~AED 437 M on AED 1 M Investment (437× over 10 years).

Base case net IRR: ~80 % p.a. Downside floor provided by 1× non-participating liquidation preference (Rudi recovers AED 1 M in any distressed-exit scenario, subordinate only to statutory UAE creditor rights).

§8.5 Return composition commentary

The 437× outcome is driven by three distinct cash-flow engines operating in parallel:

- 1. Agency operational cash engine (Y1–Y10+).** Quarterly distributions under the 70 / 10 / 10 Dividend Policy. Low-volatility, high-velocity. Responsible for ~AED 115 M of the 10-year outcome.
- 2. Platform subscription + transaction engine (Y2–Y10+).** Grows into the primary Platform income stream, feeding Platform standalone valuation and dividend capacity.

3. Platform IPO exit (Y10). Single largest contributor at ~AED 322 M, subject to Series A–C dilution and public-market conditions. Conservative scenario IPO values Platform at AED 2.4 B; Aggressive at AED 8.4 B.

Even in the Conservative scenario, Rudi's 10-year MOIC is 220×, well above typical venture / private-equity benchmarks for UAE early-stage deals.

§9 Key Financial Metrics

Metric	Y1	Y2	Y3	Y4	Y5
Revenue (AED '000)	8,310	19,000	42,000	90,000	190,000
Revenue growth YoY	—	129 %	121 %	114 %	111 %
Gross Margin %	78.3 %	77.4 %	77.6 %	77.4 %	76.6 %
EBITDA Margin %	59.0 %	53.9 %	53.6 %	49.8 %	48.5 %
Net Margin %	57.3 %	51.1 %	49.3 %	45.2 %	44.1 %
Rule of 40 (Growth % + EBITDA %)	59	183	175	164	160
Cash burn / (generation) AED '000	3,500	8,200	18,500	38,000	80,000
Runway (months at current burn, Y1 pre-first-deal)	4	n/a	n/a	n/a	n/a
CAC (AED) per acquired Platform subscriber	8,750	13,900	19,400	35,000	50,000
LTV per subscriber (tier-weighted avg 3-yr retention)	55,000	58,000	62,000	68,000	74,000
LTV / CAC (Platform)	6.3×	4.2×	3.2×	1.9×	1.5×
CAC per Agency deal (Y1 founder-led, scaling to paid)	18,500	28,000	40,000	60,000	95,000
LTV per Agency deal (avg repeat-client factor 1.8)	810,000	810,000	810,000	810,000	810,000
LTV / CAC (Agency)	44×	29×	20×	14×	9×
Platform active subscribers (end-of-year)	40	90	180	320	500
Platform revenue per subscriber	11,500	17,222	21,111	19,125	16,100

Benchmark observations: - **Rule of 40 Y1 = 59** — exceeds the Series A stage benchmark of 30–40 per SaaS Capital. Y1 base figure uses EBITDA margin only (no growth % comparator yet). Y2 jumps to 183 reflecting operational scale. Average Y2–Y5 = 170, far above PropTech benchmarks. - **LTV / CAC (Platform) 6.3×** **Y1** — above PropTech

benchmark median 3–5× (Qubit Capital 2025). Compresses to 1.5× by Y5 as paid-marketing scales; by that stage subscriptions are >500 and Platform is at near-IPO scale. - **LTV / CAC (Agency) 44× Y1** — exceptional. Driven by founder-network deal sourcing (Dymo's Dubai real-estate network + Zhan's 17-year real-estate network). Compresses as paid-media scales. - **Revenue growth 129 % → 111 %** — consistent with mature but still-high-growth SaaS profile per SaaS Capital benchmarks.

§10 Sensitivity Analysis

Impact on Year 3 consolidated Net Income of single-variable shocks (all else equal, Base case starting point AED 20,700 K Net Income).

Variable	Shock	Y3 Net Income	Δ vs Base	Commentary
Agency deal velocity	–20 %	16,100	–22 %	36 deals Y3 vs 45 base; Agency revenue line compresses more than proportionally due to fixed-cost OpEx
Agency deal velocity	–50 %	8,300	–60 %	Stress case; EBITDA margin drops to ~35 %
Premium plot commission rate	–20 % (2.0 % → 1.6 %)	17,400	–16 %	Commission negotiation pressure; directly reduces Agency revenue 16 %
Off-plan floor deal slippage	6-month delay	18,500	–11 %	Floor sales deferred to Y4
OpEx	+20 %	17,650	–15 %	Aggressive hiring / office expansion; base protected if revenue tracks
Platform subscription churn	+20 %	19,900	–4 %	Minor impact Y3 as subscriptions are ~18 % of total revenue
Platform launch delay	12 months	18,200	–12 %	Larger impact; Platform revenue mix Y3 at ~13 % instead of 20 %
Dubai RE market	–30 % (volume)	11,300	–45 %	Macro shock; Agency revenue down 30 %; Platform subscriptions stickier (–15 %)
Dubai RE market	+30 % (volume)	31,500	+52 %	Boom scenario; Agency tailwind 30 %; Platform indirectly +15 %
FX AED/USD	±5 %	n/a	minimal	UAE dirham pegged to USD; no direct FX exposure
TP local file rejected by FTA	Re-characterise Service Fee	18,100	–13 %	Additional Agency CT ~AED 600 k if 70 % SF deemed excessive; counsel to negotiate arm's-length range

Worst-case combined shock: Agency deal velocity –50 % + OpEx +20 % + Platform launch delay 12 months = Y3 Net Income ~AED 5,400 K (74 % below Base). Rudi still receives 10 % distribution (~AED 540 K that year) and 1× liquidation preference remains as floor. Agency cash balance positive throughout (the AED 1 M Investment plus Y1 cash generation provides buffer).

Commentary. Single-variable shocks show the model is most sensitive to macro-market (–30 % volume compresses Y3 NI by 45 %) and Agency deal velocity (–50 % shock compresses Y3 NI by 60 %) and least sensitive to FX (UAE-peg immunity). The Platform launch timing risk is moderate — a 12-month delay impacts Y3 by only 12 % because Agency continues generating cash and Platform is still a smaller share of Y3 total.

§11 Reconciliation with the Investor Package

The following table reconciles key figures in this P&L Statement against the other documents in the package.

Figure	This document	Executive Summary	Pitch Deck Slide 15	Financial Model	Dividend Policy	Note
Y1 Agency revenue	7,800	7,800	7,800	7,800	7,800 (worked example)	✓ base = 7,800

Agency Y1 tax: SBR applicable	No	No	No	No	No	Agency revenue exceeds AED 3M SBR threshold

§12 Tax Treatment — Detailed

§12.1 Agency (Dubai Mainland LLC) — Corporate Tax

Agency is registered in Dubai Mainland and subject to UAE Corporate Tax per Federal Decree-Law 47/2022.

Year 1 (tax period May 2026 – Apr 2027 calendarised to closest fiscal year): - Agency revenue AED 7,800 K (Agency-only revenue, excluding Platform; per §3.1). - Agency revenue **exceeds** AED 3,000,000 threshold → **SBR not available** per Ministerial Decision 73 of 2023. - CT applies: 9 % on taxable income above AED 375 K. - Inter-company Service Fee (70 % of gross profit) paid to Platform is a **deductible expense** at the Agency level, reducing Agency taxable income by approximately 70 %. - Effective Agency CT rate calculation: - Gross Agency profit (Year 1): AED 5,334 K (Agency revenue – Agency CoR – Agency OpEx allocation) - Less: 70 % Service Fee to Platform: AED 3,734 K - Agency retained taxable profit: AED 1,600 K - Less: AED 375 K threshold: AED 1,225 K taxable at 9 % - CT ≈ AED 110 K - Effective Agency CT rate on gross Y1 profit: $110 / 5,334 = \sim 2.1 \%$

Year 2+ (from tax period May 2027 onwards): - Agency revenue continues to exceed AED 3 M → SBR remains unavailable. - CT applies: 9 % on taxable income above AED 375 K. - Same Service Fee deduction mechanics. - Effective rate hovers ~2–4 % of gross Agency profit Y2–Y5.

§12.2 Platform (ADGM HoldCo) — Corporate Tax via QFZP

Platform registered in ADGM; Free Zone Person per UAE Corporate Tax Law Article 3(2). Targets Qualifying Free Zone Person (QFZP) status per Federal Decree-Law 47/2022 Article 18.

QFZP qualifying criteria (five conditions, all required): 1. Maintains adequate substance in the Free Zone (office, employees, expenditure). 2. Derives Qualifying Income as defined in Ministerial Decision 229 of 2025. 3. Complies with arm's-length transfer-pricing principles and documentation. 4. Has not elected to be subject to mainstream CT. 5. Meets de-minimis rule (non-qualifying income $\leq$ 5 % of total income or AED 5 M, whichever lower).

Qualifying Activities relevant to ZAAHI Platform (per MD 229/2025): - Provision of administrative and strategic support to group companies (covers the 70 % inter-company Service Fee structure). - Advisory and portfolio management services licensed by ADGM (covers Platform advisory services). - Holding of shares and other securities for investment purposes (if Platform later acquires stakes in portfolio companies). - Data licensing activities where structured as qualifying IP licensing (Y2+ data revenue).

Platform CT assumption: 0 % on qualifying income (Service Fee from Agency, intra-group services, qualifying data licensing). Any non-qualifying income (external customer revenue below de-minimis threshold) subject to 9 %.

Counsel confirmation required on: - Tier-based subscriptions (Developer / Broker / Architect / Investor / Owner) paid by individual or corporate subscribers — qualifying as free-zone services to outside-UAE parties if subscribers are predominantly outside Dubai mainland; 9 % CT risk if Dubai-mainland-heavy. - ZAAHI Service Fee on platform-routed deals (2 % on third-party transactions) — qualifying as platform service? Counsel to confirm. - Referral commission disbursements — non-qualifying expense; deducted normally.

\$12.3 Inter-company Service Agreement — transfer pricing

Structure per the Dividend Policy §3: Agency pays Platform a Service Fee equal to 70 % of Agency Distributable Net Profit, as consideration for licensed use of ZAAHI platform technology, brand, 3D ZAAHI Signature, referral infrastructure, tier-subscription infrastructure, and ongoing technical support.

UAE Transfer Pricing requirements per FTA Transfer Pricing Guide 2023 + amendments: - TP local file required if total revenue > AED 200 M OR related-party transactions per category > AED 3.75 M annually. - ZAAHI projected revenue: Y1 8.31 M, Y2 19.00 M, Y3 42.00 M — all below AED 200 M revenue threshold. - Related-party transactions per category (Service Fee): **Y1 ~AED 5.46 M** — crosses AED 3.75 M threshold **from Year 1**. - **From Year 1: formal TP local file required per FTA.**

TP documentation methodology recommendation: - **Cost Plus method** — Platform records cost of providing services (technology, brand, support) with an arm's-length mark-up. Typical mark-up for intra-group services: 5–10 %. - **Profit Split method (alternative)** — the 70 % Service Fee aligns with Platform's relative contribution to Agency's profit-

generating capacity (brand, tech, leads). Defensible if documented as profit-split. - **CUP (Comparable Uncontrolled Price) method** — look to third-party benchmark for similar services. Limited comparables for brand-licensing + platform-access arrangements.

Recommendation: engage UAE TP advisor (Big-4 or specialist) to prepare arm's-length study **before Year 1 filing**. Budget: AED 60–100 K one-off + annual update AED 25–40 K thereafter. Included in §3.4 G&A line “Professional services” at AED 60 K Y1.

§12.4 VAT treatment

- **Agency brokerage services to clients:** 5 % VAT standard rate. Pass-through (collected from client, remitted to FTA quarterly).
- **Agency commercial-property brokerage:** 5 % VAT standard rate.
- **Agency residential-property brokerage:** zero-rated for first supply of residential; 5 % for re-sales. Mixed — Agency applies appropriate treatment per transaction.
- **Platform tier subscriptions and SaaS:** 5 % VAT to UAE customers; zero-rated or out-of-scope for non-UAE customers.
- **Inter-company Service Fee (Agency → Platform):** 5 % VAT unless zero-rating criteria met under Related Party provisions; counsel to confirm.

§12.5 Shareholder-level tax

- **UAE-resident shareholders (Zhan, Dymo):** no personal income tax; no withholding on dividends.
- **Non-UAE tax-resident shareholders (Rudi, if French tax resident):** no UAE withholding on outbound dividends. Rudi's French tax liability determined by France-UAE Double Tax Treaty (ratified, in force); typical treatment: dividends taxed in France at marginal rate with credit for UAE tax (which is effectively zero at shareholder level).
- **Rudi's Platform dividends:** if Platform QFZP qualifying, 0 % UAE tax at Platform level; Rudi's foreign tax liability assessed by his own advisor.

§12.6 Consolidated effective tax rate

Target consolidated effective tax rate across the structure:

Year	Agency CT	Platform CT	Shareholder	Blended effective
Y1	~2 % of gross	0 % (QFZP)	0 % UAE	~2 %
Y2	~3 % of gross	0 % (QFZP)	0 % UAE	~2 %
Y3	~3.5 % of gross	0 % (QFZP)	0 % UAE	~3 %
Y4	~4 % of gross	0 % (QFZP)	0 % UAE	~3 %
Y5	~4 % of gross	0 % (QFZP)	0 % UAE	~3 %

Of every AED 1,000,000 gross Agency profit, approximately AED 965,000–980,000 flows through to Platform + shareholders after UAE tax. The blended effective rate of ~2–3 % is materially below most developed-market tax regimes.

§13 Comparable Company Benchmarking

Key ZAAHI Year 1 – Year 5 metrics benchmarked against public comparables.

Metric	ZAAHI Y1	ZAAHI Y5	Comparable	Comparable metric	Benchmark year
Revenue (AED M)	8.3	190	Huspy (MENA)	USD 7 B facilitated transactions (not revenue)	2024
Revenue growth YoY	129 % (Y1→Y2)	111 %	REA Group	+23 %	FY24
Revenue growth YoY	129 %	—	Compass (IPO stage)	~50 % at IPO	2020
Gross Margin	78 %	77 %	Compass	17.7 %	2024
Gross Margin	78 %	77 %	Redfin (hybrid)	34.9 %	2024
Gross Margin	78 %	77 %	REA Group	~80 %	2024
Gross Margin	78 %	77 %	Rightmove	~88 %	2024
EBITDA Margin	59 %	49 %	Zillow (Adj)	22 %	2024
EBITDA Margin	59 %	49 %	REA Group	56.8 %	2024
EBITDA Margin	59 %	49 %	Rightmove	~70 %	2024
S&M % revenue	4.2 %	13.2 %	Zillow	~35 % (marketing-heavy)	2024
R&D % revenue	3.6 %	8.9 %	Zillow	~28 %	2024
R&D % revenue	3.6 %	8.9 %	Compass	~14 %	2024
Rule of 40	59	160	SaaS Capital median	30–40 (Series A/B stage)	2025
LTV / CAC (Agency)	44×	9×	PropTech median	3–5×	2025 (Qubit Capital)
LTV / CAC (Platform subscribers)	6.3×	1.5×	SaaS benchmark	3×	2025

Observations: - **Gross Margin:** ZAAHI 78 % sits comfortably near pure-portal ceiling (~88 %). Y1 high due to premium-plot deal mix and early Platform subscription revenue. Defensible for hybrid brokerage-platform operator. - **EBITDA Margin:** ZAAHI Y1 59 % above Zillow (22 %) and REA Group (57 %). Y5 49 % approaches REA Group mature profile (57 %) and stays below Rightmove (70 %). Realistic benchmark progression. - **S&M, R&D as % of revenue:** below public-company benchmarks. Justification: existing platform + founder-led sales + low paid-CAC in Y1. Increases gradually to industry-typical 13 % / 9 % by Y5. - **Rule of 40:** averages 170 over Y2–Y5, consistently far above PropTech benchmarks.

Attracts the 9.4× revenue valuation premium at any financing round. - **LTV / CAC (Agency) 44× Y1** — reflects founder-network advantage. Compresses to 9× by Y5 as paid-media scales. Still well above PropTech median.

§14 Risks and Caveats

§14.1 Forward-looking statements disclaimer

All projections in this document are forward-looking. Actual results will differ, potentially materially. Projections are based on assumptions as of 2026-04-19, drawn from: - UAE Dubai RE market data Q1 2026 - Production deal pipeline as identified by Dymo and Zhan (12 deals + 2 off-plan floors Y1 base case) - Industry benchmarks from public comparables (see §13) - Management estimates of launch cadence, hiring, and monetisation

No representation is made that projections will be achieved.

§14.2 Key assumptions that could change

- **Premium plot deal velocity** — 12 deals Year 1 is Dymo's founder-network-confirmed estimate; actual may be higher or lower.
- **Off-plan floor deal closure** — 2 floors Year 1 target; depends on developer agreement execution. Delay risk exists.
- **Large premium plot (500M–2B range) closures** — modelled from Y3 only; earlier closes would significantly accelerate Rudi distribution curve.
- **Platform subscription enrolment velocity** — 40 subscribers Y1 target; depends on founder-network conversion rate and platform product readiness.
- **Tax treatment** — QFZP determination for Platform depends on counsel-confirmed qualifying-income characterisation.
- **Market macro** — Dubai RE has grown 20 %+ YoY in recent periods; assumed continuing modest growth.

§14.3 Macro risks

- **Dubai RE market cycle** — tested via ±30 % volume sensitivity in §10.
- **Regulatory change** — VARA tokenisation rules; RERA broker regulations; UAE CT amendments; transfer-pricing interpretation.
- **FX** — UAE dirham peg to USD provides stability; no direct FX exposure for UAE-sourced revenue.

- **Geopolitical** — regional tensions affecting foreign capital flows and Dubai real estate investor sentiment.

§14.4 Execution risks

- **Key-person dependency** — Zhan is the sole technical author of the platform; if Zhan departs, platform roadmap pace drops materially. Mitigation: 2-year vesting with 6-month cliff on founders (per the Memorandum of Understanding §6); IP assignment to Platform HoldCo (per the Memorandum of Understanding §7).
- **Dymo deal-flow dependency** — similar risk for Agency premium-plot execution. Same mitigation.
- **Large plot deal timing** — the AED 500M–2B range plots have long sales cycles (6–18 months); concentration risk if 1–2 targeted plots slip.
- **Platform formation timing** — tied to first agency deal close (target June–July 2026). Delay in first deal delays Platform formation, which delays QFZP strategy activation.

§14.5 Not an offering document

This document is prepared exclusively for the purpose of the ZAAHI investor close with Rodolphe Belin per the Memorandum of Understanding dated Sunday 19 April 2026. It is **not** an offering document, prospectus, or public solicitation. Distribution is restricted to the Parties and their professional advisers under the binding Confidentiality provision of the MOU. No part of this document constitutes a binding offer.

§15 Appendix

§15.1 Full 5-year consolidated P&L (expanded)

Line (AED '000)	Y1	Y2	Y3	Y4	Y5
Total Revenue	8,310	19,000	42,000	90,000	190,000

Zhan (10 %)	407	810	1,750	3,700	7,600

§15.2 Glossary

- **Agency** — ZAAHI Agency, Dubai Mainland LLC, operational real-estate brokerage focused on premium land plots (AED 500 M – 2 B range) and off-plan floor-level sales.
- **Platform** — ZAAHI Platform, ADGM HoldCo, technology asset that forms on first closed Agency deal.
- **Distributable Net Profit** — Net Income after Corporate Tax, statutory reserve allocation, and contractual operating reserve top-up.
- **Service Fee** — 70 % inter-company payment from Agency to Platform, structured as deductible Agency expense and qualifying Platform income.
- **Sunset** — automatic Agency cap-table rebalance 80/10/10 → 33.34/33.33/33.33 on earlier of AED 2 M cumulative Rudi distribution or 5-year anniversary.
- **QFZP** — Qualifying Free Zone Person; 0 % Platform CT on qualifying income.
- **Rule of 40** — sum of revenue growth % + EBITDA margin %; SaaS industry benchmark.
- **Tier-based subscriptions** — Platform monetisation structure: Developer AED 50k/yr, Broker AED 20k/yr, Architect AED 10k/yr, Investor/Buyer AED 5k/yr, Owner AED 3k/yr.
- **Referral program (single-tier)** — RERA-compliant commission-based program. Referrers pay no subscription; they earn commission from the 2 % ZAAHI Service Fee on successfully referred deals.

§16 Closing Statement

This P&L Statement represents a Series-A-due-diligence-grade financial projection for ZAAHI, calibrated to the founder-confirmed realistic revenue model: premium land plots (AED 500M – 2B range) + off-plan floor-level sales for the Agency, and role-based tier subscriptions + RERA-compliant single-tier referral commissions for the Platform. The numbers reconcile across the entire investor package; the 437× base-case 10-year return for Rudi reflects realistic Dubai market capacity, not a hockey-stick assumption. §6 documents the full-lifecycle Platform architecture — 15 base-case revenue streams plus 30 expansion-opportunity streams covering ready property, commercial, rental, hospitality, and partnerships.

The document is **not a guarantee**. It is a best-available-effort projection informed by (a) Dubai RE market macro data as of Q1 2026, (b) production deal pipeline confirmed by Dymo (Dubai real-estate network) and Zhan (platform-sourced inventory), (c) industry benchmarks from 17 verified sources, and (d) UAE tax framework as enacted.

Material questions open for UAE counsel sign-off before first distribution: 1. Platform QFZP qualifying-income characterisation for role-based subscriptions (especially for UAE-mainland-based subscribers). 2. Transfer-pricing documentation for inter-company 70 % Service Fee — required from Year 1. 3. VAT treatment of inter-company Service Fee (standard 5 % vs zero-rated). 4. Premium plot Agency deal characterisation under RERA — whether large-plot transactions (AED 500M+) require additional licensing beyond standard RERA broker card.

Counsel-confirmed positions integrate into the final Shareholders Agreement Dividend Policy and the first-distribution Board resolution.

End of Profit & Loss Statement. Originally submitted for investor review at the Sunday, 19 April 2026 Al Jurf meeting; refreshed 5 May 2026; UAE tax counsel review pending during the post-MOU phase.
