REAL ESTATE OS

Competitor Deep Dive — UAE PropTech 2026

CONFIDENTIAL — COMPETITOR DEEP DIVE

As of 5 May 2026

COMPETITOR DEEP DIVE — 2026

Document: Competitive Intelligence Brief **Prepared for:** Zhan (Founder/CEO/CTO), Dymo (Co-founder), Rudi (Investor) **As of:** 5 May 2026 **Original drafting date:** 2026-04-20 **Original branch:** `research/vision-and-competitors-2026-04-19` **Purpose:** Honest read of every major UAE real estate platform / brokerage competitor, with gaps ZAAHI can exploit and partnerships to replicate. **Classification:** CONFIDENTIAL

Executive takeaways

- 1. ZAAHI is not competing with any single player head-on.** Bayut / Property Finder dominate *listings* (our \$01 / \$02). Huspy dominates *mortgage* (our \$22, not yet live). PRYPCO / Propy dominate *tokenisation* (our \$35, not yet live). DAMAC / Emaar dominate *development* (our \$19, tier-subscribed). Better Homes / Allsopp / E&V dominate *secondary brokerage* (our Agency). Each is a Block of the Master Tree — ZAAHI is the OS across all Blocks.
 - 2. No competitor has architected a plot-centric graph.** All listings platforms index buildings / units. All tokenisation platforms index buildings. No one indexes **plots** as first-class entities with DDA affection plans, building limits, and 3D massing. This is the ZAAHI-only moat today.
 - 3. Three competitors worth watching as potential partners, not rivals:** Huspy (mortgage, embed their widget), PRYPCO (tokenisation, channel our plots through their VARA sandbox), Engel & Völkers (luxury brokerage, co-list premium plots with Dymo's network).
 - 4. Most alarming gap** — Huspy disclosed \$270 M in home financing processed with a reported 25–30 % UAE mortgage share *as of 2024 Series B press* (2026 share not yet publicly refreshed); has \$100 M+ raised. If Huspy adds a listings portal + 3D, they catch up on our listing moat in 18 months. We need Huspy as a *partner*, not a competitor. See §3 for full framing.
 - 5. The category isn't a zero-sum fight.** Dubai Q1 2026 transaction volume was AED 252 B (+31 % YoY). Every platform is growing. The question is which ones build infrastructure deep enough to survive the 2028–2030 correction and compound afterward.
-

1. Bayut

Product

UAE's No. 2–3 property classifieds portal by traffic (~1.7 M monthly visits per Similarweb). Aggregates listings from thousands of brokerages. Property search, map view (2D), price estimation, agent directory, market reports. Features “trusted broker” badge, RERA compliance display.

Pricing / Revenue model

Listing fees from brokerages (SaaS subscriptions + per-listing credits). No transactional rake. Reported parent-group (Dubizzle Group) H1 2025 revenue: \$133 M, up 26.6 % YoY. Full year 2024: \$222 M. EBITDA margin ~47 %.

Funding stage

Owned by Dubizzle Group (EMPG). **Tried Dubai IPO late 2025 offering ~30 % share capital, withdrew days before listing** citing “optimal timing” — in practice, the prospectus showed four years of losses before the 2025 turnaround. Backed by Affinity Partners (Jared Kushner), General Atlantic, KCK Group.

Geographic focus

UAE primary. Expanding into Saudi Arabia (EMPG has Saudi operations). Parent group operates across MENA + South Asia.

Recent news 2025–2026

- Delayed IPO late 2025.
- Q1 2026: published market reports flagging AED 682 B full-year 2025 transaction volume, forecast AED 1 T for 2026.
- April 2026: announced trends report (“stability and maturity” narrative).
- Parent Dubizzle Group actively financing Saudi scale-up from UAE cash flow.

Feature gaps ZAAHI can exploit

- **2D map only.** No 3D. No plot-level geometry. No affection plans.
- **Buildings, not plots.** Their atom is the listing; they have no representation for vacant land plots or plot-level attributes.
- **No AI concierge.** Their chat is generic. No UAE-specific knowledge (Oqood, Ejari, Trakheesi).

- **No tier-subscription ambassador model.** Commodity per-listing fee.
- **No tokenisation, no blockchain.**
- **No feasibility calculator.** Can't serve developers or land investors who think in GFA × sell-price.

Partnerships we could replicate

- **RERA “first platform fully DLD-compliant”** — Bayut used this as PR. ZAAHI should achieve the same certification Q3 2026.
- **Market report distribution** — Bayut publishes weekly market data; their PR loops this through Gulf News, The National, Gulf Business. ZAAHI can replicate with 114-parcel premium insights (we have the data Bayut doesn't).

Team / offices

Dubizzle Group HQ in Dubai; team 1,000+ across MENA. Single Dubai office footprint.

2. Property Finder

Product

UAE's No. 1 property classifieds portal by traffic and revenue. Agent directory, property search, map, insights reports, mortgage finder (partial — routes to banks but not a full Huspy-competitor), agent CRM (Qanat — acquired). Operates Property Finder Group across MENA + Turkey.

Pricing / Revenue model

Listing fees + premium placement + agent CRM subscription. Revenue ~\$614.8 M (reported). Established dominant classifieds category leader.

Funding stage

Raised \$170 M in January 2026 — Mubadala \$75 M lead, UAE sovereign wealth fund \$75 M, BECO Capital \$20 M. Total funding raised: **\$835 M across 7 rounds from 8 investors**, plus \$250 M debt from Ares Management + HSBC. Previously backed by General Atlantic, Tiger Global. **Total capital of ~\$1 B** — one of the best-capitalised proptechs globally.

Geographic focus

UAE primary, MENA expansion (Qatar, Bahrain, Saudi, Egypt), Turkey.

Recent news 2025–2026

- **January 27, 2026:** \$170 M Mubadala-led funding confirmed. This is pre-IPO positioning.
- Now considered the de-facto UAE-sovereign-backed proptech; Mubadala's participation signals state endorsement.
- Expanding team, AI integration in search, launching “market intelligence” product competing with JLL / Knight Frank.

Feature gaps ZAAHI can exploit

- **Still 2D map + listing cards.** No 3D, no plot geometry.
- **Mortgage routing is shallow.** Routes to banks; doesn't handle pre-approval end-to-end (Huspy does that better).
- **No tokenisation, no blockchain.**
- **No tier-ambassador model.** No lifetime memberships.
- **No developer feasibility tools.**
- **AI is generic Q&A — no UAE-specific knowledge depth.**

Partnerships we could replicate

- **Mubadala / sovereign backing** — long-term goal for ZAAHI Platform pre-IPO round.
- **JLL / Knight Frank data partnerships** — ZAAHI can replicate through Dymo's Equilibrium network.
- **“Data-first” content strategy** — Property Finder publishes detailed district-level reports monthly. ZAAHI should ship a quarterly Premium Plot Report (114-parcel focus).

Team / offices

~700+ employees across MENA. Dubai HQ, offices in Abu Dhabi, Cairo, Doha, Istanbul. Led by CEO Michael Lahyani (founder, retired from CEO Dec 2024; now vice-chairman).

3. Huspy

Product

Mortgage-first super-app for real estate in MENA. Consumer-facing mortgage pre-approval, agent-facing mortgage origination platform, acquired mortgage brokerages (Just

Mortgages UK, Finance Lab UAE). Now positioning as “real estate super-app” — expanding beyond mortgage into listings + transactions.

Pricing / Revenue model

Commission on each mortgage closed (revenue share with bank partner). SaaS for agent platform.

Huspy disclosed \$270 M in home financing processed (as of 2024 press). Market share claim of 25–30 % dates from 2024 communications; 2026 share may differ.¹ ZAAHI's competitive response remains: partner (Risk 1 mitigation) rather than displace.

¹ Figures as of Huspy's 2024 Series B press; 2026 market share not yet publicly updated.

Funding stage

\$59 M Series B (July 2025) led by Balderton Capital and Peak XV (ex-Sequoia India). Total funding now >**\$100 M** across Series A (\$37 M, 2022) + Series B. Also backed by Abu Dhabi-based 4DX Ventures, Class 5 Global, BECO Capital, Fintech Collective.

Geographic focus

UAE core, expanding into Spain (multi-city), Saudi Arabia (2025 entry), and 10-city footprint globally over 4 years.

Recent news 2025–2026

- **July 2025:** Series B \$59 M closed.
- Acquired Just Mortgages (UK) and Finance Lab (UAE) — inorganic roll-up strategy.
- Partnered with Emirates NBD, Mashreq, FAB, and ~20+ banks / lenders.
- Planning Saudi entry + Spain multi-city.

Feature gaps ZAAHI can exploit

- **No plot-level data, no 3D, no affection plans.**
- **Focuses on mortgage for apartments / townhouses, not land plots or premium off-plan.**
- **No tokenisation, no blockchain.**
- **No ambassador model.**
- **No developer-side tooling** (their primary user is a mortgage-seeking buyer, not a developer).
- **Their map is 2D and is imported from 3rd party.** Weak visual differentiation.

Partnerships we could replicate

- **Emirates NBD + Mashreq + FAB mortgage partnerships** — these are exactly the banks ZAAHI needs for \$22. Huspy proves they'll partner with well-positioned platforms. Relationship path: Dymo's banking contacts → pilot → API.
- **Abu Dhabi-based 4DX Ventures** — a VC ZAAHI should talk to.
- **Balderton + Peak XV** — pre-Series A conversation targets for Platform.

Risk to ZAAHI

This is the most strategic competitor. Huspy's trajectory (super-app, \$100 M+ raised, 25 % UAE mortgage share, Saudi expansion) puts them on a collision course with ZAAHI if they add listings + 3D. Three options:

1. **Partner early.** Embed Huspy's mortgage pre-approval widget on ZAAHI plot pages. Revenue share on closed mortgages. This positions ZAAHI as the discovery layer + Huspy as the finance layer.
2. **Outrun on data depth.** Huspy has mortgage; they don't have affection plans, plot geometry, 3D. If we expand 114 → 500 → 1 500 plots with full data, they can't catch up.
3. **Acquisition target.** If Platform reaches Series A at AED 300–500 M valuation, Huspy becomes an acquisition candidate (or vice-versa — we are an acquisition candidate for them).

Recommendation: pursue partnership (option 1) in 2026. Keep options 2 and 3 open.

Team / offices

~300 employees (post-acquisitions). Dubai HQ. Offices in UK, Spain, Saudi (opening). Founders: Jad Antoun (CEO), Khalid Ashmawy (CTO).

4. PRYPCO

Product

Real estate super-app launched by Dubai-based serial entrepreneur Amira Sajwani (daughter of DAMAC's Hussain Sajwani). Currently operates PRYPCO Mint — **the MENA region's first government-endorsed tokenised real estate platform**, launched in partnership with DLD, VARA, and UAE Central Bank, with Zand Digital Bank as banking partner.

Pricing / Revenue model

Fractional investment from AED 2 000 minimum ticket. Transaction fee on primary issuance, spread on secondary market, premium subscription tiers. Also runs PRYPCO Blocks (mortgage services), PRYPCO One (luxury concierge), PRYPCO Homes (ready / off-plan listings).

Funding stage

Self-funded by Sajwani family (pre-PRYPCO sibling of DAMAC); no disclosed external rounds. Strategic government partnership with DLD is worth more than any Series round — they literally run DLD's tokenisation pilot.

Geographic focus

Dubai exclusive (regulatory positioning).

Recent news 2025–2026

- **February 20, 2026: Secondary market trading for 7.8 M real estate tokens went live on PRYPCO Mint** — AED 5 M+ worth of tokenised properties tradable 24 / 7 via XRP Ledger + Ripple support.
- **DLD tokenisation Phase 2 launched** — secondary market regulated.
- **Market projection:** tokenised assets to represent 7 % of Dubai's real estate market by 2033 (~AED 60 B / \$16 B).
- Continues DLD Real Estate Sandbox participation.

Feature gaps ZAAHI can exploit

- **No plot-level visualisation. No affection plans.**
- **Focused on tokenising *ready properties*, not land plots or off-plan.**
- **No AI concierge.**
- **No agent / broker CRM.**
- **Limited to properties Sajwani family acquires or partners on** — small catalogue (dozens of properties, not thousands).

Partnerships we could replicate

- **DLD + VARA + Central Bank + DFF (Dubai Future Foundation) Real Estate Sandbox** — ZAAHI must apply to join this sandbox. Path: Dymo → DLD relationship → sandbox application for **plot-level tokenisation** (a category PRYPCO doesn't occupy).

- **Zand Digital Bank** — banking partner for tokenisation flows; relevant to ZAAHI's future Sovereign Bank (\$53).
- **XRP Ledger / Ripple** — infrastructure partner; ZAAHI is Polygon + Ethereum-first, but XRPL on the UAE regulatory stack is worth exploring.

Risk to ZAAHI

Medium. PRYPCO owns tokenisation *for ready properties*. ZAAHI should occupy **tokenisation for land + off-plan + fractional JV** — adjacent, not overlapping. Potential partnership: ZAAHI provides the plot graph; PRYPCO tokenises select plots as a service.

Team / offices

Small team (dozens). Dubai HQ. Founder: Amira Sajwani.

5. Propy

Product

US-originated blockchain real estate transaction platform. Automates end-to-end real estate closings with smart contracts, title & escrow operations, NFT deed issuance. Not UAE-focused — US primary market, expanding via AI-led acquisition roll-up of title / escrow companies.

Pricing / Revenue model

SaaS subscription for agents + per-transaction fee. Acquires title & escrow companies to vertically integrate. Target: fragmented \$25 B US title + escrow industry.

Funding stage

\$100 M credit facility from Metropolitan Partners Group (January 29, 2026). Earlier backing from Tim Draper and others. Tokenised project via PRO Token.

Geographic focus

US primary. Global aspirations via NFT deeds but limited real traction outside US.

Recent news 2025–2026

- **January 29, 2026:** \$100 M credit facility announced.

- Partnership with Parcl (on-chain real estate analytics, July 2024).
- PropTech Connect 2026 Dubai conference participation.
- Pilot programs with government authorities (unspecified; likely US county-level).

Feature gaps ZAAHI can exploit

- **Virtually no UAE presence.** Their NFT / blockchain title work is US-focused.
- **Not integrated with DLD or VARA.**
- **No plot geometry, no 3D, no affection plans.**
- **Language / compliance gap** — their platform is English-only, US legal framework.

Partnerships we could replicate

- **Title + escrow vertical integration play** — ZAAHI's \$10 Insurance + \$32 Escrow could replicate Propy's model in UAE: acquire / partner a DDA-registered escrow provider and a DLD-approved title insurance broker.
- **NFT deed infrastructure** — Propy's smart contracts are a reference architecture for \$35 Tokenisation Phase 2.

Risk to ZAAHI

Low. Propy is US-focused. Only overlap is philosophical (blockchain-first). No direct competition in UAE.

Team / offices

~200 employees. San Francisco HQ. Ukraine engineering office. Founder: Natalia Karayaneva.

6. DAMAC Properties (brokerage arm)

Product

Primary: private real estate developer — ultra-luxury residential / hospitality / branded (Cavalli Tower, DAMAC Lagoons, Riverside). **Secondary: in-house sales / brokerage team** that sells DAMAC inventory + selectively resells secondary. Not a horizontal brokerage like Better Homes.

Pricing / Revenue model

Off-plan sales + handover + yield on retained hospitality units. Not a platform / not a SaaS.
Revenue = development sales.

Funding stage

Public → privatised. Currently private, ultra-large balance sheet. Sajwani family controlled.

Geographic focus

Dubai primary; London, Saudi, Maldives projects; Abu Dhabi.

Recent news 2025–2026

- **March 2026: AED 3.12 B sales in a single month across 1 106 transactions.** Q1 2026: 3 663 units sold.
- **2025 total:** AED 36 B sales.
- Positioned as No. 1 developer by Dubai monthly transaction volume, ahead of Emaar in March 2026.
- Consistently expanding inventory (branded residences, hospitality).

Feature gaps ZAAHI can exploit

- **Closed ecosystem.** DAMAC's brokerage arm sells DAMAC inventory only. They don't cross-list, don't aggregate secondary market, don't serve other developers.
- **No tech platform.** Their sales happen via WhatsApp, Excel, in-person. ZAAHI can be DAMAC's *tech layer* (developer subscription AED 50 k / yr).
- **No plot-level exposure** — they transact in units, not land.

Partnerships we could replicate

- **Developer subscription tier** — if we can land DAMAC on the Developer tier (AED 50 k / yr) as a reference, every smaller developer follows. Route via Dymo → Sajwani family contacts (his network overlap with Dubai developer circle).
- **Cross-listing** — ZAAHI Platform lists DAMAC off-plan inventory for ZAAHI users; DAMAC's in-house sales team takes leads.

Risk to ZAAHI

None directly. DAMAC is a developer, not a platform competitor. They are a **customer** on the Platform.

Team / offices

~2 500 employees total (inc. construction, hospitality). Dubai HQ. International offices London, Riyadh, Doha.

7. Emaar Properties (brokerage / sales arm)

Product

Largest listed UAE developer. Branded residential (Downtown, Dubai Hills, Emaar Beachfront, Dubai Creek Harbour), malls (Dubai Mall), hospitality, entertainment. In-house sales team + extensive external broker program (Emaar Annual Broker Awards — top-performing agencies recognised).

Pricing / Revenue model

Development sales + recurring income (malls, hospitality, leisure, commercial leasing, international) — **recurring income = 26 % of revenue, 32 % of EBITDA**. This is a far more diversified cash stream than any pure brokerage.

Funding stage

Publicly listed (DFM: EMAAR). Market cap in tens of billions AED.

Geographic focus

Dubai primary; Egypt, Saudi, Pakistan, India, Turkey internationally.

Recent news 2025–2026

- **2025 full year: AED 80.4 B property sales, AED 49.6 B revenue, AED 25.7 B net profit before tax, AED 155 B revenue backlog** — record year.
- **Q1 2026: AED 17.2 B sales in first 2 months alone (+118 % YoY).**
- **Feb 2026: Annual Broker Awards for top external agencies.**
- **Emaar Development announces AED 4 B (100 %) dividend payout.**

Feature gaps ZAAHI can exploit

- **Same as DAMAC — closed ecosystem, no tech platform.**

- **Relies on external brokers** (hundreds of agencies) and Annual Broker Awards as their engagement vehicle. This is exactly where a tier-subscription model fits — Emaar brokers paying AED 5 k Gold to access ZAAHI's map + 3D + feasibility tools.
- **No plot-level data / no 3D / no AI.**

Partnerships we could replicate

- **Emaar Annual Broker Awards model** — ZAAHI should run Ambassador of the Year awards by Q4 2026 (Gold ambassador with highest downline revenue).
- **Emaar exclusive developer listings** — target Emaar Developer tier subscription (AED 50 k / yr); their external broker network = our distribution.

Risk to ZAAHI

None directly. Customer, not competitor.

Team / offices

~6 000 employees. Dubai HQ. CEO: Mohamed Alabbar (founder + chairman).

8. Better Homes

Product

Oldest UAE brokerage (est. 1986). Secondary market primary + off-plan + rentals + property management + short-term lets. 8 500+ properties under management. Traditional brokerage with comprehensive services.

Pricing / Revenue model

Commission (2 % standard on sale, variable on rental). Property management fees (5–8 % of annual rent). Short-term holiday home management.

Funding stage

Private. Recently acquired by Bahraini investor group (~2018). No public financials.

Geographic focus

Dubai primary + Abu Dhabi + international referral network via LeadingRE (global affiliation).

Recent news 2025–2026

- Continued office expansion in Dubai.
- Strong in secondary market + rentals (complementary to off-plan-heavy developer channel).
- LeadingRE global referral network membership — international buyer inflow.

Feature gaps ZAAHI can exploit

- **No proprietary tech** — uses industry-standard CRMs.
- **No plot-level data, no 3D, no AI.**
- **Legacy brand identity** — trusted but not innovative. 2026+ buyers (esp. foreign HNWI) want tech.

Partnerships we could replicate

- **LeadingRE global referral network membership** — ZAAHI Agency should apply to LeadingRE. This channels international HNWI into Dubai via ZAAHI. Annual fee ~\$5 k–\$25 k USD; ROI in 1 deal.
- **Property management arm** — ZAAHI's \$13 Property Management can partner initially (white-label Better Homes' PM services on Platform-listed rentals).

Risk to ZAAHI

Low-medium. Better Homes is a direct competitor to ZAAHI Agency (both brokerages). But ZAAHI Agency positions premium plots / off-plan floors (not ready secondary), so overlap is limited. At scale (Year 3+), overlap grows.

Team / offices

250+ agents. Multiple Dubai offices (Business Bay HQ, Palm Jumeirah, etc.). Founded by Linda Mahoney (retired).

9. Allsopp & Allsopp

Product

Modern Dubai brokerage focused on secondary market + off-plan + property management. Known for aggressive marketing, strong agent training, volume-driven culture. 500+ agents, \$77.8 M revenue (reported).

Pricing / Revenue model

Commission (2 % standard), 46 % sales growth in H1 2025 secondary market. Average agent earnings AED 400 k / yr (\$108 k), top brokers earn AED 5 M / yr (\$1.36 M).

Funding stage

Private. Founded 2008 by Lewis Allsopp (Chairman) + Carl Allsopp (CEO).

Geographic focus

Dubai primary; limited international (UK referral).

Recent news 2025–2026

- **H1 2025:** 46 % sales increase in Dubai secondary market.
- 651 employees (2025 count), up from ~500 in 2023.
- Continued aggressive recruitment + marketing spend.

Feature gaps ZAAHI can exploit

- **No proprietary tech. Listings distributed via Bayut / Property Finder.**
- **No plot-level data.**
- **Commission-heavy culture** — agents are incentivised to close volume, less to build long-term client relationships.

Partnerships we could replicate

- **Agent training program** — Allsopp invests heavily in agent training. ZAAHI's \$72 Education should ship a Broker Certification course by Q4 2026.
- **PR-first marketing** — Allsopp brothers are media-forward. Dymo should mirror with selective press + LinkedIn.

Risk to ZAAHI

Medium. Allsopp is aggressive and volume-driven. If they notice our Ambassador tier model works, they will replicate it within 12 months. Mitigation: get tier-ambassador program to >500 paid Gold / Platinum members before anyone can copy the commission-walker engineering.

Team / offices

500+ agents, 651 total employees. Dubai primary offices.

10. Engel & Völkers Dubai

Product

Global luxury real estate network franchise. Dubai operation is ~10 years old. 250+ luxury advisors. Curated portfolio (Palm, Downtown, Emirates Hills, Dubai Hills). Global cross-border referrals via 1 000 offices across 35 countries / 16 700+ advisors worldwide.

Pricing / Revenue model

Commission (2–5 % on luxury). Franchise royalties to E&V global. Private Office services for UHNWI (bespoke advisory).

Funding stage

Global E&V is private, German-origin. Dubai is franchisee (multiple sub-franchisees per district).

Geographic focus

Global luxury — 35 countries, 1 000 locations. Dubai is one of ~20 top-tier markets.

Recent news 2025–2026

- Appointed **exclusive real estate agency for P.O.B1 Properties** (Saif Al Ghurair Real Estate Group's new development division).
- Team grew from 200 → 250 advisors.
- Focus on Palm, Downtown, Business Bay, Emirates Hills, Tilal Al Ghaf, Dubai South, Dubai Hills, Arabian Ranches.

Feature gaps ZAAHI can exploit

- **Zero tech innovation.** Catalogue and referrals via email + internal CRM. No 3D, no plot data.
- **Franchisee model — slow adoption of new platforms.** Each franchisee is autonomous; global rollout of new tech is glacial.
- **Limited UAE-specific knowledge depth outside luxury residential** — no land plot, no off-plan strategy tooling.

Partnerships we could replicate

- **Global network membership model** — ZAAHI Agency could apply for E&V franchise (high bar, but Dymo's credentials + Dubai positioning fit). Less likely vs. LeadingRE.
- **Exclusive representation model** — E&V wins exclusive rights to sell specific developer inventory (e.g., P.O.B1). ZAAHI Agency can pursue similar exclusive deals via Platform cross-listing.

Risk to ZAAHI

Low. E&V is luxury-only, tech-slow, franchisee-locked. Not a direct platform competitor. Potentially a **partnership target** — E&V Dubai could pay for Platinum tier access to ZAAHI's premium plot pipeline.

Team / offices

250+ advisors in Dubai; global HQ Hamburg. Local franchisees: Dubai Marina, Downtown, Palm, Hills, etc.

Feature gap summary

Gaps ranked by strategic importance to ZAAHI (high → low):

Gap	Competitors who have it	Status in ZAAHI	Priority
Bank mortgage API partnerships	Huspy, Property Finder (partial)	✗ NOT STARTED (\$22)	P1
DLD Real Estate Sandbox access	PRYPCO	✗ NOT STARTED	P1
Sovereign wealth fund backing	Property Finder (Mubadala)	✗ NOT STARTED	P2 (long-term)
LeadingRE / global referral membership	Better Homes	✗ NOT STARTED	P2
Full DLD compliance certification	Bayut, Property Finder	● PARTIAL	P1
Agent training / certification program	Allsopp, Emaar broker awards	✗ NOT STARTED (\$72)	P2
Tokenised property secondary market	PRYPCO	✗ NOT STARTED (\$35)	P3
Title + escrow vertical integration	Propy (US)	✗ NOT STARTED (\$10 + \$32)	P2
Developer exclusive agency rights	E&V (P.O.B1)	● PARTIAL (Dymo pipeline)	P1
Monthly / quarterly market reports	Bayut, Property Finder	✗ NOT STARTED (\$66)	P2

Partnerships to pursue (prioritised)

1. **Emirates NBD / ADCB mortgage API** (Q3 2026 target) — route: Dymo → bank CRE heads.
2. **DLD Real Estate Sandbox** (Q3 2026 target) — route: Dymo → DLD Smart Services. Apply for plot-level tokenisation track (adjacent to PRYPCO, not overlapping).
3. **LeadingRE Global Referral Network** (Q2 2026 target) — low-friction application, unlocks international HNWI inflow.
4. **Huspy mortgage widget embed** (Q3 2026 target) — defensive partnership to pre-empt Huspy's super-app expansion.
5. **Mubadala / DIFC / ADGM conversation** (2027+ target) — Platform Series A positioning.

Competitive moats — defensibility ranking

Offensive moats (ZAAHI already has, compounds with time)

1. **114 verified parcels with affection plans** — each month Dymo adds 5–10 more; the gap widens.
2. **3D ZAAHI Signature engineering** — ~1.5 k LoC, 6 engineer-months to replicate.
3. **Multilingual AI with UAE real estate domain knowledge (Archibald)** — 6-month training lead.
4. **Ambassador tier + 3-level commission walker** — unique in UAE; locks in brokers with USDT lifetime payment.
5. **Master Tree architecture** — 85 modules, plugin system — the strategic roadmap competitors lack.

Defensive moats (we need to build)

1. Bank mortgage partnerships — Huspy's lead.
2. DLD sandbox access — PRYPCO's lead.
3. Paid user acquisition budget — Property Finder \$835 M raised, Bayut parent group \$1 B+ revenue.
4. Brand recognition — Bayut / Property Finder 10-year head start.

Recommendations — next 90 days

1. **Land first bank partnership.** Target ENBD (Dymo has a contact). Shippable in 12 weeks if bank signs. Unlocks \$22 LIVE.
 2. **Apply to DLD Real Estate Sandbox** for plot-level tokenisation pilot. Non-overlapping with PRYPCO.
 3. **Apply to LeadingRE.** AED 25 k / yr investment. Unlocks international HNWI inflow.
 4. **Launch Ambassador referral push.** Target 50 Gold-tier signups by end-Q2 2026 (AED 250 k subscription revenue; lock in the moat before anyone copies).
 5. **Ship Market Intelligence v1** (\$66). Replicates Property Finder / Bayut monthly report cadence but differentiates via plot-level granularity.
