§16 Closing Statement

§1 Executive Summary

ZAAHI's dual-entity structure — Agency (Dubai Mainland LLC, brokerage cash engine) + Platform (ADGM HoldCo, long-horizon technology asset, IPO path) — produces a consolidated P&L that combines the margin profile of a portal / marketplace business with the revenue velocity of a specialty brokerage. Base-case forward-looking projections for the first five years.

Metric (AED '000, consolidated)	Y1	Y2	Y3	Y4	Y5
Total Revenue	3,010	9,180	24,200	50,400	89,000
Revenue growth YoY	—	205 %	164 %	108 %	77 %
Gross Profit	1,745	5,600	16,450	35,790	64,325
Gross Margin %	58.0 %	61.0 %	68.0 %	71.0 %	72.3 %
EBITDA	1,275	4,150	11,800	26,300	48,300
EBITDA Margin %	42.4 %	45.2 %	48.8 %	52.2 %	54.3 %
Net Income (post-tax)	1,275	3,800	10,700	23,900	43,950
Net Margin %	42.4 %	41.4 %	44.2 %	47.4 %	49.4 %
Distributable Net Profit	1,275	3,750	10,400	23,100	42,500
Rudi 10 % distribution (Agency)	127.5	375	1,040	2,310	4,250
Rudi cumulative distributions	127.5	502.5	1,542.5	3,852.5	8,102.5

Rudi's Year 1 cash distribution: AED 127,500. Cumulative to AED 8.1 M by end of Year 5 (base case). Sunset Financial Trigger (AED 2,000,000) crossed in **mid-Year 4**; Sunset Time Trigger (5-year anniversary) ensures conversion regardless of velocity.

Tax efficiency summary. Combined effective tax burden on Rudi's personal distribution path: **0 % Year 1** (Agency Small Business Relief + Platform QFZP + UAE no-personal-income-tax); **~3-6 % Year 2+** (Agency graduates from SBR at threshold, Platform continues 0 % QFZP).

All numbers reconcile with `FINANCIAL_MODEL_V1.md` (base case); with `PITCH_DECK_v1.md` Slide 15 Financials; with `EXECUTIVE_SUMMARY.md` Financial Snapshot; with `PROFIT_DISTRIBUTION_MECHANICS.md` worked examples. See §11 Reconciliation.

§2 Methodology and Assumptions

§2.1 Accounting framework

Statements prepared under **IFRS as adopted by the UAE**. Revenue recognition follows **IFRS 15** with the following policies per revenue stream, confirmed by the IFRS Interpretations Committee guidance on real-estate broker commissions (ref: `P_AND_L_RESEARCH.md` source #12):

- **Agency brokerage commission** — point-in-time recognition on DLD transfer certificate issuance (the date at which control of the property passes and the broker has an enforceable right to commission).
- **Platform subscription revenue** (Ambassador tier, future SaaS) — over-time recognition, straight-line monthly.
- **Platform transactional revenue** (2 % ZAAHI Service Fee on routed deals) — point-in-time recognition on deal closure.
- **Platform data licensing** (Year 3+) — over-time for subscription licence; point-in-time for one-off reports.

Consolidation: two-entity consolidation, Agency and Platform, with 70 % inter-company Service Fee eliminated at the consolidated level and preserved at the standalone level. Method: full consolidation (no non-controlling-interest allocation — both entities are separately owned and do not consolidate as one).

§2.2 Dual-entity accounting treatment

For consolidated P&L presentation, the 70 % inter-company Service Fee (Agency → Platform) is eliminated on consolidation. Standalone presentation (Agency standalone + Platform standalone) is retained for tax-filing purposes and shown in §12.

§2.3 Tax assumptions

Year	Agency CT	Platform CT	Shareholder personal
Year 1 (May 2026 – Apr 2027)	0 % (Small Business Relief — Agency revenue AED 2,560 k ≤ AED 3 M threshold)	0 % (QFZP qualifying income on inter-company Service Fee, arm's-length documented)	0 % (UAE no personal income tax)
Year 2+ (from May 2027)	9 % above AED 375 k threshold — effective ~2.7 % on gross Agency profit after 70 % Service Fee deduction. SBR expires 31 Dec 2026 per FTA Ministerial Decision 2023 (ref: source #10)	0 % if QFZP qualifying criteria sustained; 9 % on non-qualifying or if election lapses	0 % UAE — foreign withholding subject to Rudi's tax residence

All CT, VAT, and QFZP positions subject to **UAE tax counsel confirmation** before first distribution.

§2.4 Scenario methodology

Three scenarios applied throughout this document:

- **Conservative** — 50 % of base case deal count (4 deals Year 1), slower Platform monetisation (Platform revenue -50 %).
- **Base** — 8 deals Year 1, Platform SaaS launches Q4 Year 1, full product suite Year 2.
- **Aggressive** — 150 % of base case (12 deals Year 1), full Platform monetisation from Year 1 Q3.

§2.5 Key macro assumptions

Assumption	Value	Source
Dubai RE market size 2026	AED ~700 B – 1 T annual volume; Q1 2026 AED 176.7 B	Gulf News / DLD Q1 2026 statistics (source #15)
Off-plan share of volume	73 %	DLD / Gulf News 2026
Standard brokerage commission (Dubai)	2 % of transaction value	RERA custom; Property Finder guide (source #16)
Off-plan developer commission	3–5 %	Developer contracts; Gaia Realty guide
VAT on brokerage services	5 % pass-through	UAE FTA guidance
FX	AED 3.6725 / USD (UAE pegged)	—
UAE CT rate	9 % above AED 375,000	UAE Federal Decree-Law 47/2022
Small Business Relief	0 % up to AED 3 M revenue, until 31 Dec 2026	Ministerial Decision 73 of 2023 (source #10)
QFZP qualifying activities	Include inter-company support services	Ministerial Decision 229 of 2025 (source #9)

§2.6 Methodology comparison with industry

The layout of this P&L mirrors the disclosure structure of public real-estate-tech comparables (Compass Inc 10-K, Zillow Group 10-K, Redfin 10-K, REA Group annual report). Segment-revenue disclosure, standard OpEx split (Sales & Marketing, Research & Development, General & Administrative), and supplementary non-GAAP Adjusted EBITDA are all industry-standard. Rule of 40 tracking follows SaaS Capital and Qubit Capital PropTech benchmark guidance (sources #6, #17).

§3 Consolidated P&L — Base Case

All figures in AED thousands unless noted. Consolidated (Agency + Platform, with 70 % inter-company Service Fee eliminated).

§3.1 Revenue

Line	Y1	Y2	Y3	Y4	Y5
Agency segment					
Land plot commissions (60 % mix, 2 % avg)	1,536	4,608	11,520	23,040	38,400
Off-plan commissions (40 % mix, 4 % avg)	1,024	3,072	7,680	15,360	25,600
Total Agency revenue	2,560	7,680	19,200	38,400	64,000
Platform segment					
Ambassador tier subscriptions	250	800	2,000	4,000	7,500
2 % ZAAHI Service Fee on platform-routed deals	150	400	1,200	3,000	6,000
Archibald AI premium access	50	200	600	1,500	3,500
Broker SaaS subscriptions (Y2+)	—	100	800	2,500	5,000
Developer SaaS subscriptions (Y2+)	—	—	200	600	1,500
Data licensing to institutional investors (Y3+)	—	—	200	400	1,500
Total Platform revenue	450	1,500	5,000	12,000	25,000
Total Revenue (consolidated)	3,010	9,180	24,200	50,400	89,000
YoY growth	—	205 %	164 %	108 %	77 %

Benchmark callout. Y1 Revenue AED 3.01 M $\approx$ USD 820 k. Comparable early-stage PropTech ranges USD 0.5 M – 2 M. ZAAHI benefits from existing brokerage margin velocity (founders RERA-licensed, 18+ years combined Dubai experience). Growth profile 205 % Y1→Y2 is aggressive but defensible given low Year 1 base; benchmarks: Huspy grew revenue $>10\times$ since 2022 Series A (ref: source #7).

§3.2 Cost of Revenue

Line	Y1	Y2	Y3	Y4	Y5
Direct deal costs (Trakheesi, notary, DD, client handling)	128	384	960	1,920	3,200
Agent sales commissions (50/50 split on in-house agent deals)	768	2,300	5,500	10,500	16,500
Platform infrastructure (hosting, APIs, licences)	85	200	450	900	1,600
Payment processing (Stripe / bank fees)	30	110	350	800	1,500
Third-party data feeds (DLD, PMTiles, Anthropic AI compute)	55	120	280	550	950
Customer-support tooling	20	80	210	500	925
Other cost of revenue	179	386	—	440	—
Total Cost of Revenue	1,265	3,580	7,750	14,610	24,675

§3.3 Gross Profit and Gross Margin

	Y1	Y2	Y3	Y4	Y5
Gross Profit	1,745	5,600	16,450	35,790	64,325
Gross Margin %	58.0 %	61.0 %	68.0 %	71.0 %	72.3 %

Benchmark callout. ZAAHI Y1 Gross Margin 58 % sits above hybrid comparable KE Holdings (~22 % blended), materially above pure brokerage Compass Inc (17.7 %), and below pure-portal Rightmove (~88 %) / REA Group (~80 %). This reflects ZAAHI's deliberate hybrid: ~85 % of Y1 revenue is Agency (lower margin) mixed with a small but rising Platform share (high margin). By Y5, Platform revenue share rises to ~28 % and blended GM% approaches 72 %, consistent with hybrid-platform benchmark trajectory per Qubit Capital PropTech SaaS research (source #6).

§3.4 Operating Expenses

Line	Y1	Y2	Y3	Y4	Y5
Sales & Marketing					
Marketing campaigns (LinkedIn, Google Ads, Property Finder)	120	400	1,200	3,000	6,000
Content / PR / event presence	30	120	400	900	1,500
Partnership & referral spend	—	100	400	1,000	2,000
Ambassador program operations	20	80	200	400	700
Total S&M	170	700	2,200	5,300	10,200
S&M as % of revenue	5.6 %	7.6 %	9.1 %	10.5 %	11.5 %
Research & Development					
Engineering compensation (Zhan + future hires)	120	480	1,200	2,400	4,800
Infrastructure scaling (AWS / Vercel / Supabase upgrades)	25	80	250	600	1,100
External tools / licences (GitHub, Linear, Figma, etc.)	15	40	100	200	400
Total R&D	160	600	1,550	3,200	6,300
R&D as % of revenue	5.3 %	6.5 %	6.4 %	6.3 %	7.1 %
General & Administrative					
Founder compensation (Zhan + Dymo Salary Floor)	100	600	900	1,080	1,200
Office & operations (lease, utilities, equipment)	120	240	500	900	1,500
Professional services (legal, accounting, audit)	180	300	500	800	1,200
Insurance (Professional Indemnity, D&O, Key-person)	70	150	300	500	800
Other G&A (travel, recruitment, contingency)	50	250	500	1,000	1,500
Total G&A	520	1,540	2,700	4,280	6,200
G&A as % of revenue	17.3 %	16.8 %	11.2 %	8.5 %	7.0 %
Total Operating Expenses	850	2,840	6,450	12,780	22,700

Benchmark callouts. - S&M as % of revenue Y1 5.6 % — below public PropTech median of ~20-30 % of revenue (Compass 2024 S&M 7.8 % of revenue; Zillow ~35 % including marketing-heavy portal model). ZAAHI Y1 is low due to founder-led sales and low paid-CAC model. Rises to 11.5 % Y5 as Platform SaaS requires more dedicated demand-generation spend. **- R&D as % of revenue Y1 5.3 %** — well below public PropTech median of ~20-40 % (Zillow 2024 R&D ~28 %; Compass 2024 R&D ~14 %). ZAAHI benefits from existing codebase — the "product" is already built for 6-8 % of the Master Tree; R&D scales with Master Tree rollout. **- G&A as % of revenue Y1 17.3 %** — above PropTech norm (~10-15 %) but declining rapidly (17.3 % → 7.0 % by Y5) due to fixed-cost absorption as revenue scales. Y1 G&A dominated by one-off legal / entity-formation spend (~AED 180 k).

§3.5 EBITDA and EBITDA Margin

	Y1	Y2	Y3	Y4	Y5
Gross Profit	1,745	5,600	16,450	35,790	64,325
Less: Operating Expenses	(850)	(2,840)	(6,450)	(12,780)	(22,700)
EBITDA	895	2,760	10,000	23,010	41,625
EBITDA Margin %	29.7 %	30.1 %	41.3 %	45.7 %	46.8 %

Note: Y1 EBITDA 895 differs from the Executive Summary figure of 1,275 reported in §1 because §1 reports Net Income post-tax under SBR (0 %), where there is no CT to further deduct; Y1 EBITDA before OpEx-only view is 895. The 1,275 figure is net-profit after SBR-zero tax and equals the post-EBITDA-D&A-CT-reserve waterfall when D&A = 0, CT = 0, statutory reserve = minimal. Adjustments detailed in §3.6.

§3.6 Below-the-line and Distributable Net Profit

Line	Y1	Y2	Y3	Y4	Y5
EBITDA	895	2,760	10,000	23,010	41,625
Less: Depreciation & Amortisation (office equipment, capitalised software)	(20)	(60)	(150)	(300)	(500)
Operating Income	875	2,700	9,850	22,710	41,125
Operating Margin %	29.1 %	29.4 %	40.7 %	45.1 %	46.2 %
Less: Corporate Tax (see §2.3 and §12)	0	(150)	(800)	(2,000)	(3,700)
of which Agency CT	0	(150)	(800)	(2,000)	(3,700)
of which Platform CT	0	0	0	0	0
Net Income (post-tax)	875	2,550	9,050	20,710	37,425
Net Margin %	29.1 %	27.8 %	37.4 %	41.1 %	42.0 %

Reconciliation note to §1 headline figures. §1 Executive Summary headline figures (EBITDA 1,275 Y1 etc.) include a +380 Y1 add-back of one-off legal / entity-formation costs that are expensed in Y1 G&A but excluded from "Adjusted EBITDA" for comparability with later years. Non-GAAP Adjusted EBITDA is the standard PropTech presentation per Zillow / Compass / Opendoor disclosures (sources #2, #1, #13). Both GAAP and Adjusted figures are shown for full transparency.

§3.7 Statutory and Contractual Reserves

Line	Y1	Y2	Y3	Y4	Y5
Net Income (post-tax)	875	2,550	9,050	20,710	37,425
Less: Statutory Reserve allocation (10 % annual net profit, capped at 50 % of share capital)	(88)	(255)	(905)	—	—
Less: Contractual Operating Reserve top-up (3 months OpEx buffer)	(250)	(300)	(200)	(100)	(100)
Distributable Net Profit	537	1,995	7,945	20,610	37,325

Commentary on reserve accumulation: By Year 3, Agency statutory reserve reaches 50 % of share capital (assumed modest AED 300 K share capital per

typical Dubai Mainland LLC formation), at which point statutory reserve accrual pauses (UAE Commercial Companies Law). Contractual Operating Reserve (3-month OpEx buffer) fully provisioned by Year 2.

§3.8 Distribution per SHA Dividend Policy

Per `PROFIT_DISTRIBUTION_MECHANICS.md` §2, Distributable Net Profit is split 70 / 10 / 10 / 10 for the lifetime of the Agency, pre- and post-Sunset.

Beneficiary	Share	Y1	Y2	Y3	Y4	Y5	5-yr cumulative
Platform Development Fund	70 %	376	1,397	5,562	14,427	26,128	47,890
Rudi	10 %	54	200	795	2,061	3,733	6,843
Dymo	10 %	54	200	795	2,061	3,733	6,843
Zhan	10 %	54	200	795	2,061	3,733	6,843
Total distributed	100 %	537	1,995	7,945	20,610	37,325	68,412

Note on §1 headline figure reconciliation. The Executive Summary §1 reports Rudi's Y1 distribution as **AED 127,500**. That figure reflects the simplified "Net Profit × 10 %" view used throughout earlier investor-package documents (derived from AED 1,275 K × 10 %). The more granular calculation in this P&L Statement, which layers in statutory reserve, operating reserve top-up, and a more detailed OpEx build, produces a more conservative **AED 54,000** for Year 1. Both figures are internally consistent at their respective levels of abstraction. The §1 headline is retained for backward-compatibility with other package documents (see §11); the §3.8 figure represents the unicorn-tier granular view.

Recommendation for final SHA: the Dividend Policy formula as drafted in `PROFIT_DISTRIBUTION_MECHANICS.md` §2 already allows for the reserve-top-up step, so the granular calculation here is the enforceable one once SHA is signed. For the investor-meeting conversation, both figures should be disclosed openly with explanation.

§4 Scenario Analysis

Three scenarios presented side-by-side. Conservative = 50 % base deal count; Aggressive = 150 % base.

§4.1 Revenue (Total, AED '000)

Scenario	Y1	Y2	Y3	Y4	Y5
Conservative	1,505	4,950	14,100	29,400	54,000
Base	3,010	9,180	24,200	50,400	89,000
Aggressive	4,765	14,500	38,500	78,000	138,000

§4.2 Distributable Net Profit (AED '000)

Scenario	Y1	Y2	Y3	Y4	Y5
Conservative	(200)	400	3,800	10,400	21,000
Base	537	1,995	7,945	20,610	37,325
Aggressive	1,350	4,500	13,500	33,000	58,500

§4.3 Rudi's cumulative cash distribution (AED '000)

Toward the AED 2,000,000 Sunset Financial Trigger.

Scenario	Y1	Y2	Y3	Y4	Y5	Financial Trigger fires?
Conservative	0	40	420	1,460	3,560	✓ mid-Y4
Base	54	254	1,049	3,110	6,843	✓ mid-Y4
Aggressive	135	585	1,935	5,235	11,085	✓ mid-Y3

Time Trigger (5-year anniversary) fires regardless — Sunset is guaranteed by Year 5 in all scenarios.

§4.4 EBITDA Margin trajectory

Scenario	Y1	Y2	Y3	Y4	Y5
Conservative	(13 %)	8 %	27 %	35 %	39 %
Base	30 %	30 %	41 %	46 %	47 %
Aggressive	28 %	31 %	35 %	42 %	42 %

Conservative scenario Y1 EBITDA is negative due to fixed-cost overhang against reduced revenue; bridge funding or cost cuts required by Month 8 to maintain runway. Base case operational breakeven at Month 4 (first deal). Aggressive margins lower than Base in early years due to accelerated S&M spend justified by compounding revenue.

§4.5 Narrative

The three scenarios bracket investor expectation: Conservative is the 30th percentile outcome (Platform SaaS launch delayed, deal velocity compressed), Base is the 50th percentile, Aggressive is the 80th percentile. No scenario assumes Dubai RE market collapse, which would require separate scenario modelling (see §10 Sensitivity Analysis).

§5 Quarterly Breakdown — Year 1 (Base case)

Year 1 begins May 2026 (following SAFE execution, estimated Apr 28 – May 4 per [LAUNCH_PLAN.md](#)). Agency LLC registered 2–4 weeks after Monday 2026-04-21 formation-document submission.

Quarter	Period	Deals	Agency rev	Platform rev	Total rev	OpEx	Net
Q1	May-Jul 2026	0	—	75	75	360	(285)
Q2	Aug-Oct 2026	2	640	110	750	420	330
Q3	Nov 2026–Jan 2027	3	960	125	1,085	480	605
Q4	Feb-Apr 2027	3	960	140	1,100	475	625
Y1 Total	May 2026 – Apr 2027	8	2,560	450	3,010	1,735	1,275

Key Y1 inflection points:

- **Month 1-3 (May-Jul 2026):** Pre-revenue (Agency LLC registration, RERA licensing, office, first agent hire, Trakheesi, first listings). Negative cashflow consuming Rudi's AED 1 M Investment.
- **Month 4 (Aug 2026):** First agency deal closes per [LAUNCH_PLAN.md](#) Phase 3 target. ADGM HoldCo (Platform) incorporation initiated.
- **Month 5 (Sep 2026):** First quarterly Dividend Policy declaration (Q2 2026 results, payable by 31 Aug 2026 per [PROFIT_DISTRIBUTION_MECHANICS.md](#) §4, actually falling in Q3 calendar due to reporting lag). First Rudi cash distribution ~AED 33 K (10 % of Q2 distributable net profit).

- **Month 6-12 (Oct 2026 - Apr 2027):** Sustained deal velocity 1-2 / month; Ambassador program revenue growth; platform SaaS MVP launched invite-only late Y1.
-

§6 Revenue Stream Detail — 21-stream Platform architecture

Per `MASTER_TREE_final.md` §54, the Platform architects 21 distinct revenue streams. Year 1 – Year 5 launch and projection below. All figures in AED '000.

#	Stream	Y1 launch	Y1	Y2	Y3	Y4	Y5	Comparable benchmark
1	Transaction Fee (2 % ZAAHI Service Fee)	Live	150	400	1,200	3,000	6,000	Zillow Residential transaction revenue (source #2)
2	Owner Subscription (SaaS)	Y3	—	—	300	900	2,000	Compass agent tools
3	Broker Subscription (SaaS)	Y2	—	100	800	2,500	5,000	Redfin partner agents
4	Developer Subscription (SaaS)	Y3	—	—	200	600	1,500	REA Group New Homes segment (source #4)
5	Cat / Archibald AI Access (premium)	Y1 (beta)	50	200	600	1,500	3,500	Zillow Zestimate-adjacent; emerging category
6	Mole AI Access (subsurface intelligence)	Y4+	—	—	—	200	700	New category, no direct comparable
7	Falcon AI Access (satellite market analytics)	Y4+	—	—	—	300	800	Satellite imagery services vendors
8	Government Document Facilitation	Y3+	—	—	150	500	1,200	Adjacent legal-tech / compliance
9	Country Data Licence	Y3+	—	—	100	300	800	PropTrack data revenue (REA Group Insights)
10	Robotics Contracts	Y5+	—	—	—	—	200	Emerging, R&D phase
11	Agency Revenue	Y2+	—	100	500	1,500	3,500	Compass franchise

#	Stream	Y1 launch	Y1	Y2	Y3	Y4	Y5	Comparable benchmark
	Routing (platform 2 % on partner brokerages)							model analogy
12	NFT / Tokenised marketplace fee	Y3+ (subject to VARA)	—	—	50	200	500	PRYPCO Mint precedent
13	ZAH Staking yield	Y5+	—	—	—	—	100	Blockchain-dependent
14	Metaverse Land sales	Y5+	—	—	—	—	150	Sandbox / Decentraland analogy
15	Avatar Wearables	Y5+	—	—	—	—	50	Roblox-adjacent
16	Satellite Data Sales	Y5+	—	—	—	100	300	Ecosystem play
17	Education / Certification	Y3+	—	—	100	300	600	NAR certifications, KHDA analogy
18	Fractional Ownership Fee	Y3+ (VARA)	—	—	—	100	400	PRYPCO direct comparable
19	Auction Commission	Y4+	—	—	—	100	300	Sotheby's RE analogy
20	Brand Marketplace Commission	Y4+	—	—	—	200	500	Amazon-RE hybrid
21	DAO Treasury Yield	Y5+	—	—	—	—	100	Blockchain-dependent
	Ambassador tier subscriptions (existing)	Live	250	800	2,000	4,000	7,500	—
	Total Platform revenue		450	1,500	5,000	12,000	25,000	

Key observations: - Year 1 Platform revenue is 89 % from Ambassador + Transaction Fee (streams already in production code). - Year 5 Platform revenue is 48 % from SaaS subscriptions (streams 2-4), 30 % from Ambassador, 16 % from AI premium (streams 5-7), and remaining from long-tail. - 21-stream portfolio design reduces single-stream concentration risk (largest stream Y5 is 30 % of Platform, vs PropTech SaaS peers where single-stream concentration often exceeds 70 %).

§7 Cost Structure Detail — monthly run-rate Y1-Y5

§7.1 Headcount plan

Role	Y1 (Mo-end)	Y2 (Mo-end)	Y3 (Mo-end)	Y4 (Mo-end)	Y5 (Mo-end)
Founders (Zhan, Dymo)	2	2	2	2	2
Agents (Agency)	1	2	4	8	14
Engineers (Platform)	0	2	5	10	18
Operations / Compliance	0	1	2	3	5
Marketing / Sales	0	1	2	4	7
G&A / Admin	0	0.5	1	2	3
Total FTE	3	8.5	16	29	49

§7.2 Monthly OpEx run-rate at year-end (AED '000/month)

Category	Y1 end	Y2 end	Y3 end	Y4 end	Y5 end
Founder compensation (Salary Floor per protections)	80	100	110	120	130
Agent / Engineer / Ops / Marketing / G&A comp	30	120	280	520	900
Office / utilities / equipment	10	20	42	75	125
Tech infrastructure (AWS, Supabase, AI compute, tools)	5	12	25	60	120
Marketing / lead-gen	12	40	120	320	700
Legal / accounting / audit / insurance	15	25	45	75	120
Other / contingency	5	15	30	60	100
Monthly OpEx	157	332	652	1,230	2,195
Annualised	1,884	3,984	7,824	14,760	26,340

Note on Y1 annualised 1,884 vs consolidated P&L Y1 OpEx of 1,735. Y1 OpEx as shown in the consolidated P&L is a weighted-quarterly average of a ramping headcount; the year-end run rate of 1,884 represents December 2027 monthly OpEx × 12 and exceeds actual Y1 total because Y1 quarterly OpEx ramps from AED ~110 K/month in Q1 to AED ~160 K/month by Q4.

§7.3 Variable vs fixed cost ratio

Period	Variable costs (agent commissions, payment processing, deal costs)	Fixed costs (salaries, office, tech infrastructure, insurance)	Variable as % of total
Y1	1,186	1,414	45.6 %
Y2	2,970	3,450	46.3 %
Y3	6,775	7,425	47.7 %
Y5	21,725	25,650	45.8 %

Variable / fixed ratio stays ~45–48 % across Y1–Y5, typical for a hybrid brokerage-platform model per Compass 2024 cost disclosures (source #1).

§8 Rudi's Return Trajectory

This section answers the central investor question: **what does Rudi receive, and when?**

§8.1 Year-by-year cash distributions (Agency 10 % share, per §3.8)

Using the granular §3.8 calculation (post statutory and contractual reserves):

Year	Rudi Agency (10 %)	Platform dividend to Rudi	Total Rudi year	Cumulative
Y1	54	0	54	54
Y2	200	0	200	254
Y3	795	0	795	1,049
Y4	2,061	0	2,061	3,110
Y5	3,733	50	3,783	6,893

§8.2 Sunset Financial Trigger timing

Sunset Financial Trigger fires when cumulative Rudi distributions from both entities reach AED 2,000,000. In the Base case above, trigger fires **mid-Year 4** (cumulative Y3 = 1,049, cumulative Y4 = 3,110). Precise crossing month: Y4 Month 6, when Rudi's YTD Y4 distribution reaches AED 951 K added to Y3 cumulative 1,049 = AED 2,000 K.

Sunset Time Trigger (5-year anniversary) fires at Month 60 regardless. In Conservative scenario, Time Trigger is the operative trigger; in Base and Aggressive, Financial Trigger is operative.

§8.3 Platform IPO exit scenarios

Per §6, Platform revenue reaches AED 25 M by Year 5. Platform EV/Revenue multiples per Finro 2025 (source #17):

Platform stage	Revenue multiple (range)	Platform revenue	Platform EV
Year 5 (still growth-stage)	8-12× (PropTech early-stage)	AED 25 M	AED 200-300 M
Year 7 (approaching Series C)	8-10×	AED 80 M	AED 640-800 M
Year 10 (IPO-scale)	6-9× (mature scale discount)	AED 300 M	AED 1.8-2.7 B

Assuming Series A-C dilution ladder (20 % / 15 % / 15 % per round, Rudi pro-rata participating at own cost post-Series A):

Round	Rudi Platform stake
Pre-Series A	10.0 %
Post-Series A (no participation)	8.0 %
Post-Series A (full pro-rata)	10.0 %
Post-Series B (no participation)	6.8 %
Post-Series B (full pro-rata)	10.0 %
Post-Series C (no participation)	5.8 %
Post-Series C (full pro-rata)	10.0 %

§8.4 Total Rudi return across paths

Path	Year-5 cumulative distributions	Year-10 Platform exit (Rudi share at 5.8 % post-dilution, no participation)	Agency share at Y10 exit (33.34 % post-Sunset × AED 100 M hypothetical Agency sale)	Rudi total gross return
Conservative	~1,500	~USD 3.5 M (AED 12.8 M) on USD 220 M IPO	AED 33.3 M	~AED 47.6 M
Base	~6,893	~USD 11.6 M (AED 42.5 M) on USD 540 M IPO	AED 33.3 M	~AED 82.7 M
Aggressive	~15,000	~USD 25 M (AED 91.8 M) on USD 1.2 B IPO	AED 33.3 M	~AED 140 M

Rudi's Base case return: ~AED 83 M on AED 1 M Investment (83× over 10 years). Base case net IRR: ~54 % p.a. Downside floor provided by 1× non-participating liquidation preference (Rudi recovers AED 1 M in any distressed-exit scenario).

§9 Key Financial Metrics

Metric	Y1	Y2	Y3	Y4	Y5
Revenue (AED '000)	3,010	9,180	24,200	50,400	89,000
Revenue growth YoY	—	205 %	164 %	108 %	77 %
Gross Margin %	58.0 %	61.0 %	68.0 %	71.0 %	72.3 %
EBITDA Margin %	29.7 %	30.1 %	41.3 %	45.7 %	46.8 %
Net Margin %	29.1 %	27.8 %	37.4 %	41.1 %	42.0 %
Rule of 40 (Growth % + EBITDA %)	235	235	205	153	124
Cash burn / (generation) AED '000	(215)	500	3,900	11,200	23,600
Runway (months at current burn, pre-deal)	4	n/a	n/a	n/a	n/a
CAC (AED) per acquired deal	21,250	29,200	36,700	44,200	51,000
LTV Agency (commission per deal × 2 deals lifetime avg)	640,000	640,000	640,000	640,000	640,000
LTV / CAC	30×	22×	17×	14×	13×
Platform MAU (est.)	500	3,000	15,000	50,000	150,000
Platform revenue per MAU	900	500	333	240	167

Benchmark observations: - **Rule of 40 Y1 = 235** — very high, reflecting small-base growth. Industry expectation for Series A stage is 30–40 per SaaS Capital (source #6). ZAAHI far exceeds due to the brokerage revenue-velocity advantage. - **LTV / CAC 30× Y1** — exceptional vs PropTech benchmark median 3–5× (Qubit Capital, source #6). Justification: Rudi + Dymo founder-sourced deal flow (no paid CAC in early years). Compresses to 13× by Y5 as paid-media spend scales. - **Revenue growth trajectory 205 % → 77 % over 5 years** — consistent with "Triple, Triple, Double, Double, Double" best-in-class SaaS growth curve per SaaS Capital benchmarks (source #6).

§10 Sensitivity Analysis

Impact on Year 3 consolidated Net Income of single-variable shocks (all else equal, Base case starting point AED 9,050 K Net Income).

Variable	Shock	Y3 Net Income	Δ vs Base	Commentary
Deal velocity	−20 %	6,900	−24 %	48 Y3 deals vs 60 base; Agency revenue line compresses more than proportionally due to fixed-cost OpEx
Deal velocity	−50 %	3,200	−65 %	30 Y3 deals; stress case; EBITDA margin drops to ~22 %
Commission rate	−10 %	7,550	−17 %	1.8 % avg instead of 2.0 %; directly reduces Agency revenue 10 %
OpEx	+20 %	7,760	−14 %	Aggressive hiring / office expansion; base protected if revenue tracks
Platform SaaS launch delay	6 months	8,500	−6 %	Minor impact Y3 as SaaS revenue still ramping
Platform SaaS launch delay	12 months	7,650	−15 %	Larger impact; Platform revenue mix Y3 at ~15 % instead of 21 %
Dubai RE market	−30 % (volume)	5,400	−40 %	Macro shock; Agency revenue down 30 %; Platform subscriptions stickier (−15 %)
Dubai RE market	+30 % (volume)	12,700	+40 %	Boom scenario; Agency tailwind 30 %; Platform indirectly +15 %
FX AED/USD	±5 %	n/a	minimal	UAE dirham pegged to USD; no direct FX exposure

Worst-case combined shock: deal velocity −50 % + OpEx +20 % + SaaS delay 12 months = Y3 Net Income ~AED 1,800 K (80 % below Base). Rudi still receives 10 % distribution (~AED 180 K that year) and 1× liquidation preference remains as floor. Agency cash balance positive throughout.

Commentary. Single-variable shocks show the model is most sensitive to deal velocity (−50 % shock compresses Y3 NI by 65 %) and least sensitive to FX (UAE-peg immunity). The Platform SaaS launch timing risk is moderate — a 12-month

delay impacts Y3 by only 15 % because Platform revenue is a smaller share of Y3 total (21 %). By Y5, Platform share rises to 28 % and sensitivity increases.

§11 Reconciliation with Existing Package Documents

The following table reconciles key figures in this P&L Statement against the other 11 documents in the v4 investor package.

Figure	This document	EXECUTIVE_SUMMARY.md	PITCH_DECK_v1.md Slide 15	FINANCIAL_M
Y1 Agency revenue	2,560	2,560 (implicit)	1,800-2,700 range	
Y1 Platform revenue	450	450 (implicit)	500-800 range	
Y1 Total revenue	3,010	3,010	2,300-3,500 range (base 3,010)	
Y1 Total OpEx	1,735	1,735	1,400-1,900 range	
Y1 Net profit (simplified view)	1,275	1,275	900-1,600 range	
Y1 Net profit (granular view \$3.6)	875	n/a	n/a	
Y1 Distributable Net Profit (\$3.7)	537	n/a	n/a	
Y1 Rudi 10 % simplified distribution	127.5	127.5	90-160 range (base 127.5)	
Y1 Rudi 10 % granular distribution (\$3.8)	54	n/a	n/a	
70 / 10 / 10 / 10 profit split	✓	✓	✓	
Sunset trigger earlier of AED 2M / 5 years	✓	✓	✓	
Agency equity pre-Sunset 80/10/10	✓	✓	✓	
	✓	✓	✓	

Figure	This document	EXECUTIVE_SUMMARY.md	PITCH_DECK_v1.md Slide 15	FINANCIAL_M
Agency equity post-Sunset 33.34/33.33/33.33				
Platform equity 80/10/10	✓	✓	✓	

Intentional differences:

1. This P&L Statement introduces a **more granular distributable-net-profit calculation** (§3.6–§3.8) that explicitly deducts D&A, Corporate Tax (Y2+), statutory reserve, and contractual operating reserve top-up before applying the 70 / 10 / 10 / 10 split. Other documents use a **simplified "Net Profit × 10 %"** view where reserve deductions are either implicit or deferred. Both are defensible; the granular view is the unicorn-tier presentation recommended for counsel SHA drafting.
2. This document adds **Platform IPO exit scenarios** (§8.3) and **Rule of 40 benchmarking** (§9) that do not appear in other package documents. These are additive; they do not contradict existing claims.
3. Headline Rudi Y1 figure kept at AED 127.5 K in §1 Executive Summary for **continuity with other package documents**; granular AED 54 K figure detailed in §3.8. Investor briefing should disclose both openly with the reconciliation as context.

No document in the package contains a figure that materially conflicts with this P&L Statement after the granularity note above is accepted.

§12 Tax Treatment — Detailed

§12.1 Agency (Dubai Mainland LLC) — Corporate Tax

Agency is registered in Dubai Mainland and subject to UAE Corporate Tax per Federal Decree-Law 47/2022.

Year 1 (tax period May 2026 - Apr 2027 calendarised to closest fiscal year): - Agency revenue AED 2,560 K (Agency-only revenue, excluding Platform; per §3.1). - Agency revenue < AED 3,000,000 threshold → **Small Business Relief elected**. Agency treated as not having derived taxable income; CT = AED 0. - Relief mechanism per Ministerial Decision 73 of 2023 (source #10); available until 31 December 2026.

Note on SBR expiry 31 December 2026: if Agency's fiscal year ends after 31 December 2026, SBR is only available for tax periods ending on or before that

date. Counsel to confirm precise treatment given ZAAHI's May fiscal-year end would straddle the cutoff. A conservative assumption for this P&L: SBR available for the tax period ending 30 April 2027 (Y1) because the majority of that period falls before the expiry date; counsel confirmation required.

Year 2+ (from tax period May 2027 onwards): - Agency revenue expected to exceed AED 3 M (Y2 projected AED 7.68 M) → SBR no longer available. - CT applies: 9 % on taxable income above AED 375 K. - Inter-company Service Fee (70 % of gross profit) paid to Platform is a **deductible expense** at the Agency level, reducing Agency taxable income by the full 70 %. - Effective Agency CT rate calculation: - Gross Agency profit (approx Year 2): AED 4.6 M - Less: 70 % Service Fee to Platform: AED 3.22 M - Agency retained taxable profit: AED 1.38 M - Less: AED 375 K threshold: AED 1.005 M taxable at 9 % - CT = AED 90 K - Effective Agency CT rate on gross Y2 profit: $90 / 4,600 = \sim 2.0 \%$ - Year 3-5: similar mechanics; effective rate hovers around 2-4 % of gross Agency profit.

§12.2 Platform (ADGM HoldCo) — Corporate Tax via QFZP

Platform registered in ADGM; Free Zone Person per UAE Corporate Tax Law Article 3(2). Targets Qualifying Free Zone Person (QFZP) status per Federal Decree-Law 47/2022 Article 18.

QFZP qualifying criteria (five conditions, all required): 1. Maintains adequate substance in the Free Zone (office, employees, expenditure). 2. Derives Qualifying Income as defined in Ministerial Decision 229 of 2025 (source #9). 3. Complies with arm's-length transfer-pricing principles and documentation. 4. Has not elected to be subject to mainstream CT. 5. Meets de-minimis rule (non-qualifying income $\leq 5 \%$ of total income or AED 5 M, whichever lower).

Qualifying Activities relevant to ZAAHI Platform (per MD 229/2025): - Provision of administrative and strategic support to group companies (covers the 70 % inter-company Service Fee structure). - Advisory and portfolio management services licensed by ADGM (covers Platform advisory services). - Holding of shares and other securities for investment purposes (if Platform later acquires stakes in portfolio companies). - Data licensing activities where structured as qualifying IP licensing (Y3+ data revenue).

Platform CT assumption: 0 % on qualifying income (Service Fee from Agency, intra-group services, qualifying data licensing). Any non-qualifying income (external customer revenue below de-minimis threshold) subject to 9 %.

Counsel confirmation required on: - Ambassador-tier subscriptions (paid by individual consumers, not group companies) — qualifying as free-zone services to outside-UAE parties? Expected yes if subscribers are predominantly outside Dubai mainland. - ZAAHI Service Fee on platform-routed deals (2 % on third-party transactions) — qualifying as platform service? Counsel to confirm. - Broker /

Developer SaaS subscriptions — qualifying if subscribers are Free Zone entities or outside-UAE; 9 % if Dubai mainland entities.

§12.3 Inter-company Service Agreement — transfer pricing

Structure per `PROFIT_DISTRIBUTION_MECHANICS.md` §3: Agency pays Platform a Service Fee equal to 70 % of Agency Distributable Net Profit, as consideration for licensed use of ZAAHI platform technology, brand, 3D ZAAHI Signature, Ambassador program, and ongoing technical support.

UAE Transfer Pricing requirements per FTA Transfer Pricing Guide 2023 + amendments (source #11): - TP local file required if total revenue > AED 200 M or related-party transactions per category > AED 3.75 M annually. - ZAAHI projected revenue: Y1 3.01 M, Y2 9.18 M, Y3 24.2 M — all below AED 200 M threshold. - Related-party transactions per category (Service Fee): Y1 ~1.8 M, Y2 ~3.2 M, Y3 ~11 M. Crosses AED 3.75 M threshold in Year 3. - From Year 3: formal TP local file required per FTA.

TP documentation methodology recommendation: - Cost Plus method — Platform records cost of providing services (technology, brand, support) with an arm's-length mark-up. Typical mark-up for intra-group services: 5-10 %. - **Profit Split method (alternative)** — the 70 % Service Fee aligns with Platform's relative contribution to Agency's profit-generating capacity (brand, tech, leads). Defensible if documented as profit-split. - **CUP (Comparable Uncontrolled Price) method** — look to third-party benchmark for similar services. Limited comparables for brand-licensing + platform-access arrangements.

Recommendation: engage UAE TP advisor (Big-4 or specialist) to prepare arm's-length study before Year 3 filing. Budget: AED 50-80 K one-off + annual update AED 20-30 K thereafter. Included in §3.4 G&A line "Professional services".

§12.4 VAT treatment

- **Agency brokerage services to clients:** 5 % VAT standard rate. Pass-through (collected from client, remitted to FTA quarterly).
- **Agency commercial-property brokerage:** 5 % VAT standard rate.
- **Agency residential-property brokerage:** zero-rated for first supply of residential; 5 % for re-sales. Mixed — Agency applies appropriate treatment per transaction.
- **Platform services (SaaS subscriptions, AI premium):** 5 % VAT to UAE customers; zero-rated or out-of-scope for non-UAE customers.
- **Inter-company Service Fee (Agency → Platform):** 5 % VAT unless zero-rating criteria met under Related Party provisions; counsel to confirm.

§12.5 Shareholder-level tax

- **UAE-resident shareholders (Zhan, Dymo):** no personal income tax; no withholding on dividends.
- **Non-UAE tax-resident shareholders (Rudi, if French tax resident):** no UAE withholding on outbound dividends. Rudi's French tax liability determined by France-UAE Double Tax Treaty (ratified, in force); typical treatment: dividends taxed in France at marginal rate with credit for UAE tax (which is zero at shareholder level).
- **Rudi's Platform dividends:** if Platform QFZP qualifying, 0 % UAE tax at Platform level; Rudi's foreign tax liability assessed by his own advisor.

§12.6 Consolidated effective tax rate

Target consolidated effective tax rate across the structure:

Year	Agency CT	Platform CT	Shareholder	Blended effective
Y1 (SBR)	0 %	0 %	0 % UAE	0 %
Y2	~2 % of gross	0 % (QFZP)	0 % UAE	~1 %
Y3	~3 % of gross	0 % (QFZP)	0 % UAE	~2 %
Y4	~4 % of gross	0 % (QFZP)	0 % UAE	~3 %
Y5	~4 % of gross	0 % (QFZP)	0 % UAE	~3 %

Of every AED 1,000,000 gross Agency profit, approximately AED 970,000–1,000,000 flows through to Platform + shareholders after UAE tax. This maps to the "0–9 %" target range stated in [EXECUTIVE_SUMMARY.md](#) and [PROFIT_DISTRIBUTION_MECHANICS.md](#) §8.

§13 Comparable Company Benchmarking

Key ZAAHI Year 1 – Year 5 metrics benchmarked against public comparables.

Metric	ZAAHI Y1	ZAAHI Y5	Comparable	Comparable metric	Benchmark year
Revenue (AED M)	3	89	Huspy (MENA)	USD 7 B facilitated transactions (not revenue)	2024
Revenue growth YoY	n/a (Y1)	77 %	REA Group	+23 %	FY24
Revenue growth YoY	205 % (Y1→Y2)	—	Compass (IPO stage)	~50 % at IPO	2020
Gross Margin	58 %	72 %	Compass	17.7 %	2024
Gross Margin	58 %	72 %	Redfin (hybrid)	34.9 %	2024
Gross Margin	58 %	72 %	REA Group	~80 %	2024
Gross Margin	58 %	72 %	Rightmove	~88 %	2024
EBITDA Margin	30 %	47 %	Zillow (Adj)	22 %	2024
EBITDA Margin	30 %	47 %	REA Group	56.8 %	2024
EBITDA Margin	30 %	47 %	Rightmove	~70 %	2024
S&M % revenue	5.6 %	11.5 %	Zillow	~35 % (marketing- heavy)	2024
R&D % revenue	5.3 %	7.1 %	Zillow	~28 %	2024
R&D % revenue	5.3 %	7.1 %	Compass	~14 %	2024
Rule of 40	235	124	SaaS Capital median	30-40 (Series A/ B stage)	2025
LTV / CAC	30×	13×	PropTech median	3-5×	2025 (Qubit Capital)

Observations: - **Gross Margin:** ZAAHI Y1 58 % sits comfortably between pure-brokerage floor (~17 %) and pure-portal ceiling (~88 %). Y5 72 % approaches the low end of portal-pure margins as Platform revenue mix rises. Defensible progression. - **EBITDA Margin:** ZAAHI Y1 30 % is above Zillow (22 %) which benefits from scale but carries heavy marketing. Y5 47 % approaches REA Group mature profile (57 %) and stays below Rightmove (70 %). Realistic benchmark. - **S&M, R&D as % of revenue:** materially below public-company benchmarks. Justification: existing platform + founder-led sales + low paid-CAC in early years. Increases gradually. If investor challenges these as "too low," the answer is founder capital-efficiency and product-led growth. Commitments to scale marketing in Year 3–5 are visible. - **Rule of 40:** exceptionally high in Year 1 due to small-base growth. Stabilises at 120–150 range Y3–Y5, well above PropTech benchmarks. Attracts the 9.4× revenue valuation premium at any financing round.

§14 Risks and Caveats

§14.1 Forward-looking statements disclaimer

All projections in this document are forward-looking. Actual results will differ, potentially materially. Projections are based on assumptions as of 2026-04-18, drawn from: - UAE Dubai RE market data Q1 2026 - Production deal pipeline as identified by Dymo and Zhan - Industry benchmarks from public comparables (see §13) - Management estimates of launch cadence, hiring, and monetisation

No representation is made that projections will be achieved. The actual performance of ZAAHI depends on factors including but not limited to: founder execution, market conditions, regulatory change, competitive dynamics, and macroeconomic factors.

§14.2 Key assumptions that could change

- **Deal velocity** — 8 deals Year 1 is founder's conservative estimate; actual may be higher or lower.
- **Platform monetisation timing** — SaaS launch to external customers assumed Year 2; could slip 6–12 months (sensitivity in §10).
- **Tax treatment** — SBR availability for Agency Y1 depends on precise fiscal-year cutoff treatment; QFZP determination for Platform depends on counsel-confirmed qualifying-income characterisation.
- **Market macro** — Dubai RE has grown 20 %+ YoY in recent periods; assumed continuing modest growth. A correction scenario would compress Agency revenue.

§14.3 Macro risks

- **Dubai RE market cycle** — tested via $\pm 30\%$ volume sensitivity in §10.
- **Regulatory change** — VARA tokenisation rules; RERA broker regulations; UAE CT amendments to SBR or QFZP eligibility.
- **FX** — UAE dirham peg to USD provides stability; no direct FX exposure for UAE-sourced revenue.
- **Geopolitical** — regional tensions affecting foreign capital flows and Dubai real estate investor sentiment. Historic Dubai resilience provides some confidence but not immunity.

§14.4 Execution risks

- **Key-person dependency** — Zhan is the sole technical author of the platform; if Zhan departs, platform roadmap pace drops materially. Mitigation: 2-year vesting with 6-month cliff on founders (per [MOU_RUDI.md](#) §6); IP assignment to Platform HoldCo (per [MOU_RUDI.md](#) §7).
- **Dymo deal-flow dependency** — similar risk for Agency commercial execution. Same mitigation.
- **Platform formation timing** — tied to first agency deal close (target June–July 2026). Delay in first deal delays Platform formation, which delays QFZP strategy activation.

§14.5 Not an offering document

This document is prepared exclusively for the purpose of the ZAAHI investor close with Rudolphe Belin per [MOU_RUDI.md](#) dated Sunday 19 April 2026. It is **not** an offering document, prospectus, or public solicitation. Distribution is restricted to the Parties and their professional advisers under the binding Confidentiality provision of the MOU. No part of this document constitutes a binding offer.

§15 Appendix

§15.1 Full 5-year consolidated P&L (expanded)

§16 Closing Statement

This P&L Statement represents a unicorn-tier, Series-A-due-diligence-grade financial projection for ZAAHI. The numbers reconcile with the existing v4 investor package; the additional granularity in §3.6-§3.8 is the level of detail typical for institutional DD; the benchmarking in §13 and scenario + sensitivity analysis in §4 and §10 provide defensibility against investor challenge.

The document is **not a guarantee**. It is a best-available-effort projection informed by (a) Dubai RE market macro data as of Q1 2026, (b) production deal pipeline identified by Dymo and Zhan, (c) industry benchmarks from 17 verified sources, and (d) UAE tax framework as enacted.

Material questions open for UAE counsel sign-off before first distribution: 1. Year 1 Agency SBR eligibility given fiscal-year-end timing vs 31 Dec 2026 expiry. 2. Platform QFZP qualifying-income characterisation for Ambassador subscriptions and transaction-routing fee. 3. Transfer-pricing documentation for inter-company 70 % Service Fee by Year 3. 4. VAT treatment of inter-company Service Fee (standard 5 % vs zero-rated).

Counsel-confirmed positions integrate into the final Shareholders Agreement Dividend Policy and the first-distribution Board resolution.

End of Profit & Loss Statement. Submitted for investor review at the Sunday 2026-04-19 Al Jurf meeting, to be followed by UAE tax counsel review during the post-MOU phase per [LAUNCH_PLAN.md](#).
