One hook. One deal. One page.

UAE real estate is a AED 760 billion annual transaction market fragmented across government systems and hundreds of brokerages. ZAAHI is the operating system that unifies it. Live today at zaahi.io. Rudi's AED 1,000,000 launches the Agency as an equal three-way partnership with Dymo and Zhan (33.33 % each); funds platform development from 70 % of every Agency profit; and grants Rudi 10 % of the Platform for life. No sunset, no automatic rebalance, no majority-investor dynamics — three partners aligned on one shared outcome.

The Challenge

UAE real estate — AED 682.6 billion in 2025, on pace to exceed AED 1 trillion in 2026 — operates across disconnected silos: DLD, RERA, DDA, Abu Dhabi Municipality, ADGM, DIFC, VARA, and hundreds of brokerages. A single transaction touches ten or more systems. AI, blockchain, and 3D geographic intelligence remain experimental. The platform that unifies this market wins the decade.

The Platform

ZAAHI is built on the **Master Tree v3** — 85 integrated modules across 12 functional blocks. In production today: **114 verified parcels** loaded, **556 000 plots** mapped across Dubai, Abu Dhabi, and Oman via PMTiles, 3D ZAAHI

Signature visualisation, the Archibald AI assistant, a tiered Ambassador program already generating fees, and Phase 1 dashboards for Owners, Buyers, and Brokers. Approximately **6-8 % of the Master Tree is live** today; the remaining 92 % is sequenced across a multi-year roadmap, funded from agency cash flow.

The Team

Zhan Ryspayev — Founder, CEO/CTO. 17 years real estate; full-stack engineer; RERA-licensed; architect of the ZAAHI platform and Master Tree v3 vision.

Dymo Tsvyk — Co-founder, Operations Principal. 18+ years global operations leadership at Stolt-Nielsen and Bahri; in UAE real estate since 2018; RERA-licensed.

Rudi — Principal Investor, Equal Agency Partner, Platform Minority. AED 1,000,000 commitment; one-third of the Agency; 10 % of the Platform; one board seat of three.

Tax efficiency (three-layer design)
